

Storms of life did not steal her smile, her joy was in the Lord

By Sherry Bunting

My Mother loved babies, and they loved her. I think it was her joy.

In Isaiah 4:31, the wings of an eagle are mentioned. An eagle knows when a storm is approaching and will fly to a peak and wait for the winds. Then, when the storm hits, it uses that wind to pick it up and lift it above the storm so even though the storm rages below, the eagle soars above it, not escaping it, but using the winds of the storm to go higher.

How does this relate to the life of Shirley L. (Jacobs) Curry, my Mother? She waited on the Lord. She put her faith in her Saviour Jesus Christ, so that the storms did not overcome her.

Mom endured loss and tragedy, but those storms did not steal her smile because her joy was in the Lord. She waited on Him. She lived her life and continued to show kindness to others, with a smile and laugh that people remember.

She dug in and took care of my father for 8 years with a debilitating brain disease before the Lord called him home in 2001. Then, she began working in the care of others as a professional caregiver before retiring in 2017. The tragic loss of her mother, son and youngest daughter within

a three-year span 2016 to 2019 was rough, and took a toll, but again, she waited on the Lord. Her joy was in Him.

Through her declining health in her last year, as the outer self was leaving, her inner self was being renewed. She didn't lose heart. Her sweet smile remained, and it is not only something those who knew her in health have observed, but also those who helped me care for her daily as her health declined -- that sense of humor, that smile remained.

Admittedly there were times of frustration – we are human after all. The bottomline is she didn't lose her smile, her laugh, her grit, grace, and gratefulness. She would still laugh – a belly laugh – at the funny things great grandchildren did or said, the stories brought to her of what they were up to, the visits where she would read books or have them read to her, watch their puppet shows, eat the make-believe food they prepared for her of paper and ribbons in a stash of old pots and pans.

While in the hospital last August, after her private visit with the Chaplain, I returned to her room and found her praying sweetly in her sleep, simply calling Jesus' name, asking Him to take care of all the babies in the world... and

their parents.

She loved babies. Her biggest smiles were while holding them. The most beloved of jewels were the arms of little ones around her neck.

Yes, there were bad days, but she didn't lose heart, she waited on the Lord.

My Mother would want her life to be an encouragement to others, that if things don't go the way you planned, or dreamed, or when you lose your most precious loves, or have a day of trouble communicating what you want to say...

Throught it all her faith in her Saviour sustains. He was with her in the big things and part of her every day life. He gave her wings that carried her through and over life's storms, not to escape them, but to get through them without losing her joy, her smile.

My Mother was called home to the Lord at 4:15 a.m. on Nov. 30, 2023 at the age of 84. Twelve hours earlier, we realized things had progressed, and while the hospice nurse and aide were helping me gather what I needed, she woke from a sleep, eyes wide open, flashing the most beautiful smile I have ever seen.

She looked at the three of us at her bedside and said: "One more day, and then we're going to have a party!"

Those last words are etched in my soul. Twelve hours later, I knew that she had seen — she already knew where she was headed, to be with her Lord and Saviour, her parents, my father, my brother and my sister... celebrating.

My mother's smile...

Was beautiful and bright, A twinkling star in dark of night... The piece she leaves that never dies. Joy found in simple pleasures of life, Amid the struggle and strife, That remain through time... The warmth of long-simmered oatmeal, Sprinkled with love – just-so

The learning, the gathering, the places we would go...

The way the Christmas season began Always with a marathon sand tart bake. She opened windows to faith –

The churchgoing, the choir singing,

- Showing her love for the Lord
- In her daily being.

My mother loved simple things.

A photograph, of course, a card sent, a word spoken,

A picture drawn, a flower picked, a page readied with crayons from one of her great coloring books.

She loved the sunshine on her face, The wings of birds over water taking flight, The smoothness of a treasured seashell

peeking up through rough sand, The color of a sunrise through her favorite tree,

The joy in a deep belly laugh at the funny things kids say and do

The tenderness of a baby in her arms... That life again begins anew.

Happy Mother's Day, and thank you for the opportunity to share my mother's smile, joy, and love for the Lord with all of you.

"We've loved Udder Comfort[™] for over 15 years, for any cow with edema, thickness or mastitis. We love the difference in our fresh cows, using it 2x/day for 3 to 7 days after calving to prevent damage to the udder. Knockoffs just don't do it. With Udder Comfort, we definitely know we are losing edema much faster. We see it working," say Chuck and Sue Luchsinger.

Chuck recalls getting SSF Andreas Linda ready for the New York State Fair in 2022. "We used Udder Comfort on her seam. It came out tremendous. It really brings out the natural quality and potential."

Chuck, Sue and son Charlie milk 60 elite high component Jerseys in rotational grazing at Silver Spring Farm, Syracuse, N.Y. Over half are scored EX. SSF has earned over 60 Premier Breeder and nearly 50 Premier Exhibitor banners in 100 years showing at New York State Fair. They've bred elite cows like SSF Andreas Camilla EX93, senior, grand and reserve supreme of the 2022 RAWF under the ownership of Ernie Kueffner and Terri Packard, Boonsboro, Md. At 30 days fresh, she was recently senior and grand champion of the Northeast National.

UDDER COMFORT Quality Udders Make Quality Milk

For external application to the udder only, after milking, as an essential component of udder management. Wash and dry teats thoroughly before milking.

APPLY BY MAY 20 \$5000 to be paid to 'explorer' of Pa. ice cream trail

SYRACUSE, N.Y. – American Dairy Association North East and Pennsylvania Dairy Promotion Program plan to celebrate National Ice Cream Month in July with a Pennsylvania ice cream road trip, and are currently seeking an honorary chief ice cream officer (CIO) to promote the campaign.

The CIO will be paid \$5000 to travel across the state in July to visit about 20 on-farm creameries (the list is being finalized). The assignment is to submit video blogs, or vlogs, about their visits, document their journey across the Commonwealth, and create positive dairy content for ADA North East and Pennsylvania Dairy Promotion Program social media channels.

"Pennsylvania is fortunate to have many dairy farms that are meeting consumer demand for locally produced dairy products by making their own ice cream," said Pennsylvania Dairy Promotion Program Chair Lolly Lesher of Way-Har Farms, Bernville, Pa. "The summer ice cream road trip led by our chief ice cream officer is a fun way to bring positive attention to our industry and its hardworking farmers."

Applications are being accepted through TikTok or Instagram videos only, through May 20. The clips must showcase the applicant's creativity and marketing skills and describe why they should be selected as the candidate to go on an ice cream road trip.

Applicants must be at least 18 years old, be a U.S. citizen, have a valid U.S. driver's license, a vehicle and car insurance.

ADANE's annual report is online

SYRACUSE, N.Y. – American Dairy Association North East's 2023 annual report is available online and can be found by clicking on "Annual Reports" under the "About Us" section of AmericanDairy.com

The report details the Association's programs related to retail, youth educational programs in schools, consumer education and media outreach, farmer advocacy, hunger relief collaborations, environmental partnerships, dairy ambassador and princess programs, and national partnerships.

Financial records are also included in the annual report to outline the income and expenses of dairy farmer checkoff investments.

Whole milk sales surge as Senate bill for schools remains blocked

By SHERRY BUNTING Special for Farmshine

EAST EARL, Pa. – Year-to-date Whole Milk sales for the first two months of 2024 are up a whopping 5% year-overyear (YOY) at 2.57 million pounds. Even when adjusted for Leap Year, the average daily increase is a substantial 3% surge, compared with the past several years of steady 1% increases YOY.

Flavored whole milk sales, year-todate (YTD) are up a whopping18.6% YOY. Adjusted for Leap Year, the increase is a substantial 14%.

As the number one volume category representing more than one-third of the fluid milk category since 2020, the recent surge in whole milk sales has been enough to reverse the decline in total packaged fluid milk sales in four of the past five months.

USDA tallied 2023's total packaged fluid milk sales down by a smaller mar-

gin of 1.5% for the year compared with previous years of decline; however, October and November sales were up 1% and 0.3% YOY for the first time since the months of the Covid shutdown when families ate at home. December's total packaged fluid milk sales trailed year-earlier, but January and February 2024 have come back strong.

USDA estimates total fluid milk sales were up 2.4% and 2.5% YOY for January and February, respectively. When adjusted for Leap Year, the February increase is a respectable 0.8%. Similarly, when we adjust the YTD total of 7.325 million pounds in total fluid milk sales to reflect the extra consumption day in February, this is also 0.8% higher on an average daily basis vs. year ago.

This is good news! Let's keep this upward trend MOOVING in fluid milk sales, led by surging whole milk sales -- thanks to volunteers spreading the good word.

Now, if we could just get the United States Senate off the sidelines and into cosponsoring S. 1957 Whole Milk for Healthy Kids, we could really gain some ground – and America's kids would be free to choose milk they love at school where they receive two meals a day, five days a week, three-quarters of the year.

Thanks to the U.S. House of Representatives and the leadership of Congressman G.T. Thompson of Pennsylvania, the Whole Milk for Healthy Kids Act (H.R. 1147) passed the House on December 13, 2023 by an overwhelming bipartisan majority 330 to 99. If the U.S. Senate doesn't have the opportunity to vote it through by December 31, 2024, we must start all over again in the next legislative session 2025-26!

Check out the map on this page to see how S. 1957 remains stalled for the past 60 days at just 17 sponsors from 13 states.

Where do your state's U.S. Senators stand?

Ask them! And think about their answers when going to the polls this fall. Elections have consequences.

Also consider asking your state senators and representatives to follow Tennessee's lead and get a whole milk bill passed in your state and signed by your governor.

Pennsylvania and New York State tried to be first, but leaders are afraid of USDA's monetary penalties. Maybe the No. 8 and No. 5 milk producing states can be second and third in state whole milk bill passage.

Just think what would happen if more states passed bills that allowed choice and sought creative language to let their schools choose to let children choose. Tennessee will make it available in bulk dispensers separate from the school lunch line. Pennsylvania sought to do it as a wholly in-state proposition.

Meanwhile, DMI sent a press release on April 29 touting their "checkoff-led pilot in Cincinnati schools that offered lactosefree chocolate milk increased milk consumption..." (Of course, this lactose-free pilot was also fat-free per the USDA rules for milk at school built on the Dietary Guidelines that the dairy checkoff agreed to "advance" when the memorandum of understanding was signed between the USDA, National Dairy Council, GENYOUth and the NFL in 2010).

Specifically, the pilot schools experienced a 16% increase in milk consumption and a 7% higher meal participation, according to DMI.

(Remember, this reporter warned several years ago that checkoff and dairy industry leaders would wait until lactose-free shelf-stable milk was firmly entrenched in schools before pushing whole milk choice through.

Senate Ag Chairwoman Debbie Stabenow is the main blockade this time around. She hails from the No. 6 milk producing state of Michigan,

where the foundation fairlife plant is located, collecting milk from large producers in Michigan, Indiana and Ohio. Wonder what consumption looks like when whole milk is offered as a choice.

That's right! A Grassroots PA Dairy Advisory Committee / 97 Milk trial in western Pennsylvania saw consumption grow 52% and waste decline 95%.)

So, drink up Senators! Talk to your constituent Moms this Mother's Day. Sales data and surveys both show what Moms think, and most don't even realize the federal ban, the bait-and-switch their kids face at school where milk and dairy are concerned. Then pour a tall cold glass of delicious, nutritious whole milk. It may just strengthen those political spines!

4 - Farmshine, Friday, May 10, 2024 What's UP with Class III? Settlement checks for April milk to be hard hit by record-low 83-cent protein, while cheese market's 5-week rally is heating up

For 18 months, Class III has been the underdog in milk pricing, especially rough for dairy producers in the Upper Midwest struggling under the brunt of FMMO 30 blend prices built mainly on Class III.

In fact, the April protein price hit a record low, announced May 1 at 83 cents/ lb, which is 14 cents below the 97 cents/lb announced price for solids nonfat. This has never happened before, according to our search of class and component pricing archives. The butterfat price for April is quadruple the protein price at \$3.33.

Meanwhile, the Class III milk futures haven't offered much of a breakeven price to spend money protecting with hedges or DRP...

Until now.

Class III milk futures continued higher again this week, skyrocketing limit-up for nearby contracts Wed., May 8, putting the exclamation point on five straight week of gains that have added \$3 per hundredweight to the remaining 2024 contract months -- going from the \$16s and low \$17s to the \$19s and \$20s. This is the first time the Class III milk futures board has seen \$20s in nearly 18 months.

Class IV futures also made solid 20- to 30-cent gains this week charting over \$20 and \$21s across the board.

If the current Class III rally goes too far, too fast, we could see negative PPDs in some FMMOs in June for May's milk because the May Class I advance base price mover was already announced in mid-April, based in part on the much lower advance pricing factors in the Class III market during the first two weeks of April. The 'average of' method disadvantaged the May Class I mover by \$1.73/cwt, which will undoubtedly be a factor for May milk pooling if Class I, at a base price of \$18.46, ends up the lowest class for May, except where location differentials are high enough to boost it.

Class III milk futures board sees \$20s, Spot cheese hits highest price in a year

On Wed., May 8 the Class III milk futures for the next 12 months (May24 through Apr25) averaged \$19.04, up 54 cents from the previous Wednesday. Class IV milk futures averaged \$20.86, up 22 cents from a week ago.

The milk futures rally is driven by the upward momentum in CME daily spot cheese markets, reaching levels this week that are 50 to 55 cents per pound higher than six weeks ago.

The 40-lb block Cheddar price roared 11 1/2 cents higher to \$1.95/lb in a single trading session Wed., May 8, gaining 20 cents/lb on the week, and hitting the highest level since last fall, with a single load trading. For 500-lb barrel cheese, at \$1.90/lb, the gain was a dime on the week, and the highest price in over a year, with zero loads trading.

All other dairy commodity prices were higher too, with no trades changing hands. Dry whey gained a penny at 38 1/2 cents/lb. Butter up 2 cents at \$3.02/lb, and nonfat dry milk (NFDM) up a penny at \$1.13/lb.

Dairy farmers will not see these gains in their milk checks until June, if the trend is sustained. Milk checks next week to settle April marketings may be among the lowest in months, especially for farmers in the cheese-heavy FMMOs due to the record-low 83-cent protein price and the April

"WHAT'S NEXT?" While none of us knows for sure exactly what is in the future for the dairy industry, change is coming. (1) Will antibiotics be banned by consumer demand? (2) Will milk over 100k SCC be penalized? Be ready for whatever comes next: just call 920-650-1631. & To get started: Call today! 920.650.1631 www.alphageneticsinc.com VISA Master Card AMERICAN DISCOVER Also BE A DAIRY HERO. Class III price announced at a dismal \$15.50.

Analysts tout the record volume of cheese exports in March, which were no-doubt prompted by the cut-rate January through April pricing.

But that doesn't pay bills on the dairy farm.

We have to go back to 2019 to find a 4-month Jan-April average Class III milk price that was lower than the first four months of 2024. We have to go back to the Covid shutdown in 2020 to find an April Class III milk price that was lower than April 2024.

But even then, protein held up at \$2.48/lb, not the 83 cents per pound that USDA announced for April settlement next week.

The difference this time is that fat is so much higher (quadruple the protein price at \$3.33/lb for April). This essentially pulls a credit out of protein as an adjustment in fat values for cheese vs. butter. This is a seldom-discussed and little understood function of FMMO multiple component pricing, and another downfall of the many months of wide Class IV over III divergence.

Better views ahead... Higher Class I sales and record-high made-to-order fresh mozzarella production compete with stored product output for reduced milk supply

While the rear-view mirror shows the rough road traveled, the view ahead is improving for Class III milk and the beleaguered record-low protein price. Milk production is down. Fluid milk sales are UP. Processors are making record amounts of fresh (made to order) mozzarella cheese, causing Cheddar production to slow. Meanwhile, Class IV product supplies are tight.

The most recent USDA Dairy Products Report showed cheddar cheese production down 3.3% year-over-year (YOY) in March, with all American style cheeses down 2.9%.

A positive this year that was missing last spring and summer is the draw for milk to make Italian cheeses. Mozzarella production set records in March, up 6.8% YOY, but those products are not price-surveyed, nor are they included in the FMMO Class III pricing formula.

In addition to cheddar cheese, the Class III price is also made up of dry whey sales via the 'other solids' component. Whey production for both human and animal use is accelerating as inventories of value-added whey protein concentrate (WPC) and whey protein isolates (WPI) were more than 40% below year ago at the end of March, despite March WPC production being up 1% for human use and up 40% for animal use; WPI up 73% YOY.

Dry whey is the commodity used in the FMMO Class III pricing formula with production up 2.4% for human use and 19.2% for animal use in March.

On the Class IV side, butter production was up 1.5% YOY in March with inventories up 2%. As for powders: Whole milk powder production was down 14.6% with inventory 36.3% lower YOY; Skim milk powder, typically made for export orders, was down 41.7%; and Nonfat dry milk output was down 7.9% YOY in March with inventories off 20.3%.

Milk protein concentrate (MPC) production was the contrarian -- up a whopping 38.5% YOY in March. MPCs are often used to bump cheese yields higher per hundredweight of raw milk.

These factors beg questions: Why were Class III milk prices for the first four months of 2024 at 5-year lows and protein at a record low 83 cents per pound for April? Was it the plan to crush Q-1 2024 spot cheese and Class III milk prices to generate record cheese export volumes in March? Are cheesemakers using some of that big increase in MPC production to make more cheese from each cwt of raw milk? Are bioengineered fermentation yeast proteins that are marketed in trade publications as 'dairy protein analogs' diluting the supply and demand equation fractionally?

Global picture improving

The global picture is also improving. New Zealand tallied a lower output for the season, and recent reports show stable to lower milk output in EU countries.

In the Global Dairy Trade (GDT) biweekly internet auction Tues., May 7, the all products index was up 1.8% over the previous auction on April 16. This includes a whopping 8% increase in the GDT price index for bulk Cheddar sales contracted out through November, plus a 2.3% increase in bulk Mozzarella sales for July.

In fact, GDT Cheddar contracts for June were up 6.5% in Tuesday's auction; July up 3.9%; August and September had no sales. October and November contracts were up 11.2 and 12.5%, respectively, compared with three weeks ago.

Pre-movement testing for bird/cow flu clarified

Road, Dayton.

By SHERRY BUNTING **Special for Farmshine**

HARRISBURG, Pa. - Bird flu in bovines is taking a positive direction in terms of no new detections. Pennsylvania State Veterinarian Alex Hamberg said the next one to two weeks will tell us if it is more widespread due to the federal surveillance now underway through the pre-movement testing of all lactating dairy cows crossing borders from any state to any other state.

No new cases of highly pathogenic avian influenza (HPAI) have been confirmed by USDA Animal and Plant Health Inspection Services (APHIS) in the past eight days, and only one new case in the past 20 days. The number of detections remains at 36 herds in 8 states.

USDA clarified its federal order for mandatory pre-movement testing of lactating dairy cows this week. The only exception is for interstate shipment of cows directly from the farm to a federally-inspected slaughter plant. Any lactating cows shipped across state lines to a slaughter-only auction at a sale barn must have official identification, a certified veterinary inspection (CVI) and an HPAI-negative milk sample test from a qualified lab within 7 days of transport.

Lactating dairy cows moving to sale barns within the same state, with just owner/shipper statement and back tags, may go from the sale barn to an out of state federally-inspected slaughter plant if they proceed there directly without any stops to unload any commingled animals from that trailer to a non-slaughter premises.

During the weekly industry call hosted by the Center for Dairy Excellence, Pennsylvania State Veterinarian Alex Hamberg noted that Pennsylvania raised its testing age for nonlactating dairy cattle from 12 months to 18 months. They require testing only when coming into Pennsylvania from states that have had an HPAI detection. UNIVERSITY PARK, Pa. — For those with limited or no internet access, Penn State Extension poultry and dairy educators are offering an alternative educational method --- timely production-related information via telephone.

By calling 888-655-2407, producers and hobbyists can listen to five-minute messages with tips on dairy or poultry production, the latest industry issues, and upcoming extension events.

Extension educators cover various topics, such as food safety, feed management, health and disease. The phone line turn to page 4

Leaving for Maine on June 6th Bus trip planned to five top Holstein herds

MORGANTOWN, Pa. — A bus trip to Maine is in the works for Holstein enthusiasts wishing to attend the "Built to Last Sale" at Brigeen Farms in Turner, Maine, on Saturday, June 8th. Along the way, the tour group will visit four prestigious, high-BAA herds, namely Conant Acres, Juniper, Pineland and Silver Shade

Ben Kauffman of Morgantown is organizing the trip at a cost of \$135 per person for the bus only. Expenses for lodging and meals is not included.

The bus will leave from Morgantown on Thursday night, June 6th, drive through the night and make a stop for breakfast before visiting a few of Maine's top Registered Holstein herds. The following day, Saturday, will be spent at the sale, which is scheduled to start at 11 o'clock.

Pick-up options for the trip include Morgantown, Cabela's near Hamburg and the Wilkes-Barre / Scranton region. More precise information will be provided when you make your reservation by calling Ben at 610-273-3472. Or you can email him at bkpets@upwardprint.com

The bus is scheduled to be homeward-bound around 2 p.m. on Saturday and be back in Morgantown before midnight.

Words of wisdom for grandmothers-to-be from a great grandmother

By BARB LUMLEY Ohio Farm Wife

A friend of mine recently became a grandmother for the first time. There was a picture of her and her beautiful new granddaughter on her Facebook page. Her joy was obvious! As a grandmother and a great-grandmother, I would like to pass on to her and to any other grandmothers or great-grandmothers to-be, a few "words of wisdom" that life has taught me.

Grandmother, your life has changed and it will never be the same again! Grandchildren will bring joys that you have never known before. However, be aware that just as with your children, there will also be scares, worries, accidents and concerns. That is life! The joys will outnumber those.

Many of you — including some of the great-grandmothers — have to work due to the current economic situation in our country. My friend is a very busy lady, traveling all over the country in her job. I urge her and every one of you to set aside some special time to spend with the children.

Those years from birth until they start school are very special times. They will be growing, changing, and experiencing things that only happen once in their lifetime. You will want to be there if you can. During those years they will touch your heart, bring you laughter, and their ideas and imagination are developing and wonderful! One of my favorite times was just sitting at the kitchen table and talking with Emily and Daxton. I learned a lot — some things I wasn't supposed to!

As they start school and become so involved in activities you won't get to spend as much time with them. Before you know it, they will be graduating from high school and heading out into the world. The older they get, the less time you will get to spend with them. That's life!

I am so grateful that I have been allowed to have the extra years in retirement to spend with my great-grandchildren. I consider it a special gift.

If you listen to the media and the news you know that our country is in turmoil, with protests and sad things happening at many of the places of education and the "so called" best colleges in our country.

The news people talk about it and talk about it and show the pictures where it is happening over and over and over. The one thing they do not tell us or show us is the thousands of students in our country who are going to school every day, attending classes, following the rules and causing no problems! Why doesn't the media show us those students and the colleges where there are no protesters? Many of the people protesting aren't even students! They are being paid to cause trouble! Why is bad news the only news we ever seem to see or hear?

I am a strong supporter of the youth. There are outstanding youths all over this country! They can be found in every state, every county, every big city, every small town, in every rural area, and on every farm. They are everywhere and doing outstanding things, yet they are seldom featured on the news and we are seldom told about them.

For those of us who have so many concerns about the problems in our country, hearing about them (the good kids) would certainly help us have more faith in the future of our country! Thank goodness that some of us still have local newspapers that give us stories about them and their accomplishments. It is so sad that so many local communities no longer have those local newspapers.

As a retired breeder of Registered Holsteins and a retired dairy farmer, I am a very strong supporter of our farm kids. They grow up working hard on the farm with their families and learning responsibility. So many of them belong to 4-H clubs from age 8 to 21. Many of them belong to the Future Farmers of America in high school. They learn many different things from both organizations. There are projects of all kinds for them to participate in and they will be exhibiting them at county and state fairs all over these United States. Some of them will be selling their projects. There are youth involved in numerous other organizations. They can all use your support in many ways.

Many of you have family members who live far from you, so you don't get to see grandchildren or great grandchildren very often. Find the ways to communicate with them and keep in touch. Set a certain time and day that you call and talk to them. Learn to text with them. Send them cards, notes and letters. They may save them and treasure them in later years. In the meantime, find ways to help and support youth in your local area who do not have grandparents close or have lost their grandparents.

Every child needs love and support! Our youths are the future of our country!

"There is no other love that is as special as the love of a Grandma. So warm and fuzzy, so calm and sweet, so cheerful and joyful."

— Hopal Green

Esch Hay Equipment LLC

ouflage, a junior 3-year old exhibited by Tyler Soden. Best bred and owned, open show: McWilliams Warrior Raine Red-ET

Best bred and owned, youth show: AAG-Dreams Helix Firefly, a senior 2-year old shown by Aubree Kitzmiller.

OBITUARY

Margie Ann Dick embraced an adventurous life of service

WARRENTON, Va. — Margie Ann (Sutphin), who was the "face" of the Virginia Holstein community for decades, passed away as the sun rose on April 16th at Fauquier Hospital. She was 87 and is now reunited with her only love, co-pilot and dancing partner Goley "Albin" Dick who preceded her in 2012. Margie Ann was the only child and pride and joy of Ned and Florence Sutphin.

Margie Ann grew up on the family dairy, Flatlick Farm near Chantilly, Va. She joined 4-H and with the unwavering support of her parents began showing her Holstein herd. The entire family enjoyed traveling in the 40's and 50's to exhibit cattle at local, state, and regional shows including the Virginia, North Carolina, West Virginia state fairs and The Dixie Classic.

Margie Ann was tapped as a Virginia 4-H All-Star in 1952. In 1955 she was on the Virginia 4-H Dairy Judging team coached by Emory Brubaker and Bill Patterson, 4-H Dairy Extension specialist. She placed 14th in the national contest in Waterloo, Iowa.

She shared the story many times of walking into a pitch-dark room and giving her oral reasons out loud to what she hoped was a judge in the room, without ever seeing their face. In addition, she earned a Virginia 4-H State Dairy Achievement award which resulted in a trip by train to the National 4-H Congress in Chicago.

She received the Virginia Holstein-Friesian award three times and in 1956 won the National Holstein Girl Champion Production Record Keeping Contest.

In 1962 Margie Ann gathered her records and typed up her own detailed pedigree sale catalog for a public auction of her and Ned's remaining cows and heifers. Four generations of the Sutphin/Dick family moved to Turkey Run Farm near Warrenton, Va. Margie Ann would recount how the family moved into the house, interior unseen, to highlight just how much the entire family focused on the land and barns when making purchasing decisions.

In the late 70's she put her knack for record keeping to work as membership secretary for the Virginia Holstein Association, managing the Holstein *World* account with 5 x 7 index cards for over 700 members. In 1979, she was asked to take over as secretary/treasurer and served for the next 35 years. She took the records from index cards and created the

association's first computer database with a Radio Shack Tandy computer and by the end of her service was clerking state shows and sales with a laptop ringside.

Representing Virginia Holstein Association at regional and national events, she attended 20 National Holstein conventions, often serving as a voting delegate. Over the years many Virginia Holstein members became friends and adopted family, some even keeping a spare room ready in case meetings ran long.

Margie Ann loved taking cattle to shows and fairs, sharing them with her peers and the public. Washing, getting the bedding just right and hand feeding hay was her specialty. If she was not in the barn she was at the desk, checking in entries, recording placings and sideline judging. She remembered the cows and the kids that were on the halters from show to show and year to year. She clerked and supervised the dairy and sometimes beef shows at the Fauquier County Fair, Prince William County Fair, Virginia Holstein shows and Virginia State fairs for too many years to count.

She remembered the 4-H All Star motto "Service" and gave back by serving as a

Fauquier County 4-H volunteer leader and serving the Fauquier Junior Fair as treasurer and Board member.

She combined her job with her love of driving. She and Albin criss-crossed the U.S. starting with a truck camper after they were married and moving up to a 5th-wheel trailer. In 1969 for a "little" family vacation, she drove their 1966 Ford Camper Special with a Covered Wagon truck camper from Warren-

ton, Va. to the Arctic Circle on the gravel Al-Can Highway and back to Seattle, Washington, in six weeks. Her parents flew to Seattle to take over for the return trip with camper and children. Then Margie Ann and Albin flew home on their one and only airplane ride.

She continued traveling to the National Holstein conventions from Maine to California and visiting family and attractions across the country for the next 50 years.

Margie Ann would change to different country radio stations based on the mile markers along I81, I64 & I95. She did all the driving, memorizing road numbers, exits and landmarks because Albin was busy finding cheap gas and places to eat. Margie Ann was never in an accident and somehow dodged the speed traps.

Margie Ann leaves behind her grateful son, Dale D. Dick of Midland, daughter Patricia Ann (Patty) Leonard and favorite son-in-law Jeff Leonard of Warrenton. She was the proud grandmother of Sarah A. Leonard and husband Mike Kritzer of Warrenton, Katy Henson and husband Jackson Henson of Charlotte, N.C. and Elizabeth Noonon and husband David Noonan of Warrenton. She was able to welcome three great grandchildren, Allison Grace Ann Kritzer, Dempsey Reid Noonan, and Brooks Harding Henson into the family. She also leaves behind all her adopted family far and wide that called her "Grandma Margie".

Because her passion was Holstein cows, kids with cows, and travel, "Grandma Margie's" family is asking in lieu of flowers please remember her by donating to the Virginia Junior Holstein Association to be used to support the Junior Members traveling to the National Holstein Conventions and various Junior activities. Please send your donations to the Virginia Junior Holstein Association, 7511 Briery Branch Road, Dayton, VA 22821-3233

mother cat did what any good mother would do

By ARCHIE KING **Mifflin County Farmer**

Meow! Meow! Meow! Oh you poor little kittens – your mother is gone and we don't know where to find her!

This is a story of how a mother cat and her kittens were accidentally separated and miraculously re-united.

Back home on the farm we had a very special cat named BJ. She was given to us by Uncle Mark King and had a short stubby tail like a bobcat. Of all us 10 children, Janet was the cat lover of the family.

Over the years BJ, had many litters of kittens and to Janet, every litter was special! To most of us, cats were cats - who cares! But it was always interesting when BJ had kittens, to see who could find the nest. BJ always hid them well; they were hard to find.

One day Janet proclaimed that BJ had another litter of kittens – she "could tell"! We looked and hunted for those kittens, but nobody could find them!

Soon after, on a Wednesday, Pop (Herbert) took a calf to the Belleville Sale Barn. He backed up to the dock to unload the calf and there, in the corner of the cattle truck bed was BJ and her nest of kittens! Of all places! He unloaded the calf and went to the poultry barn to buy a rooster, never thinking what might happen.

Not having a chicken crate, he bought the

rooster, opened up the stock bed roller door, threw in the rooster, and closed the door. Well, the rooster started cackling and raising an awful fuss! Poor BJ – this was just too much - a total invasion of privacy! She jumped off the truck and ran for what appeared to be "the next county"! Now what?! Pop needed to go home - without BJ. It was milking time! Dumb cat anyway!!

Well, Pop came home and, probably over supper, told all of us the sad story of the very hungry newborn kittens on the back of the stock truck, and mother BJ six miles away maybe somewhere in Belleville! Janet was heartbroken - the kittens were so small and would not survive without momma BJ! What can we do?!

Every fourth Wednesday of the month the church youth group would gather at Valley View Nursing Home to sing for the elderly folks who live

there, and this was the evening to go sing. Well, Pop had an idea. We think it was more out of compassion for Janet's sake than for the kittens, but that is unknown! When we go to sing, we take the stock truck along and drop it off at the sale barn, pull the keys, and leave it there overnight. Would it work? Would BJ come back to her kittens?

Remember the story in Daniel 6 where

This is not "BJ"; just a common representative of the species. File photo

Darius the king had a very troubled, sleepless night because Daniel was in the lion's den? That is the kind of night that Janet had! But "then came the morning ... darkness turned to light"!

Early the next morning Pop and Janet took the car (along with a cardboard box) to Belleville, and parked beside the stock truck. They put down the end gate and walked into the truck bed.

There in the corner was BJ with her kittens - their bellies full of milk and mother purring

softly! They moved the family into the cardboard box. Janet headed happily for home, and Pop went to pick up cows! BJ found her kittens right where she lost them! Oh, a mother's love; how precious!

Dear friends - how much greater is God's love for sinful men! We read of that love in John 3:16. If we are a part of the family of God, we have many precious promises in God's Word.

In Isaiah 49:15 we read, "Can a woman forget her suckling child, that she should not have compassion on the son of the womb? Yea, they may forget, yet will I not forget thee".

In all of life's joys and sorrows, trials, and disappointments, God will not forget his children. In Hebrews 13:5 we have this promise, "I will not leave thee nor forsake thee"!

And if for any reason we lose that close fellowship with our Heavenly Father, we will find Him right where we lost Him!

In the month of May we have Mother's Day. How very precious is a mother's love! It is very sad that some have been forsaken by their mother, and never experience her love.

If this has been your lot in life, I trust you have experienced a mother's love - maybe by an adopted mother or a precious motherin-law. But no matter what - God loves you and me and has promised not to forget us or forsake us! Oh, a Mother's love!

Happy Mother's Day!

World Dairy Exposition looking for four interns

MADISON, Wis. – As the 57th World Dairy Expo approaches, Expo is searching for college students passionate about the dairy industry to be part of the 2024 media team. Four students will be hired to experience the storied event as media interns.

Under the direction of Expo's communications specialist, media interns assist with media initiatives at World Dairy Expo and the management of the Media Room, Expo's onsite resource for reporters, writers and photographers.

This week-long internship in Madison, Wisconsin provides students with an active role in writing press releases, creating social media content through multiple platforms and contributing to Expo's on-site newspaper while engaging with media professionals and dairy industry representatives from around the globe.

"The media intern team plays an integral role in successfully executing this must-attend event for the global dairy industry," shares Jenna Langrehr, WDE communications specialist. "Expo is delighted to once again offer this invaluable opportunity to students from across the country who are passionate about the dairy industry and looking for a great hands-on experience."

Qualified applicants are actively pursuing a bachelor's or master's degree in a dairy, agriculture, or communicationsrelated field with excellent written and verbal communication skills. Students should visit World Dairy Expo's website, www.worlddairyexpo.com, and select "Careers & Internships" under the "About Expo" tab for the complete job description and all pertinent application details. Questions about this position should be directed to Langrehr at jlangrehr@wdexpo.com.

NoBull legal battle continues over contempt arrests

HARRISBURG, Pa. - The legal battle continues for NoBull Solutions LLC partners Rusty Herr of Lancaster County and Ethan Wentworth of York County. Both Pennsylvania men have been jailed in their respective county prisons since April 10 and 11, respectively.

They were arrested for contempt of court after failing to respond to a May 2023 contempt order and failing to comply with a 2021 investigative subpoena by providing the name and address of NoBull's custodian of records as well as the names and addresses of all members, managers, and other persons who direct its activities, according to the recently unsealed docket 325-MD-2021

Herr and Wentworth will have served their 30-day commitments by this weekend (May 10 and 11, 2024).

According to counsel Robert Barnes, Esq. of Barnes Law LLP, a Petition for Writ of Habeas Corpus has been filed with the Pennsylvania Supreme Court after a Commonwealth Court Judge denied their motion for immediate release and unsealed the docket in two separate actions on April 29, 2024.

Barnes maintains that certain procedures must be followed in a civil contempt action.

"To our knowledge those were not followed here. Wentworth and Herr were not given an opportunity to purge contempt in order to secure their release from prison - an essential requirement of civil contempt, which makes this de facto criminal contempt – a violation of Pennsylvania law," Barnes states in an email response to Farmshine.

Even though the 30-day sentences may be completed before the State Supreme Court hears their appeal, Barnes says his office will "pursue the appeal to restore proper jurisdictional basis and to force the state agencies to adhere to the Pennsylvania Constitution and the Administrative Procedures Act.'

Former Pennsylvania Department of Agriculture counsel and current staff attorney with the Penn State Center for Agricultural and Shale Law, Brooke Duer, Esq. told WPMT-Fox43 that the now unsealed docket shows the "civil processes for contempt are all there and were followed."

The April arrests stemmed from prior actions by the State Board of Veterinary Medicine, which led to a Feb. 2020 complaint filed by the Pennsylvania Veterinary Medical Association (PVMA) one month before the Covid shutdown.

The PVMA alleged that Herr and Wentworth continued practicing veterinary medicine by ultrasounding other farmers' cows in connection with NoBull's breeding management service. PVMA asked for contempt charges through Commonwealth

Court as part of that 2020 complaint.

The Department of State initiated its investigation in early 2021, issuing a subpoena order for the names and addresses of custodian of records and all parties involved in or directing activities in the business.

Both men failed to comply with the subpoena or to challenge it, according to the now unsealed docket.

'Some of us thought this had more-or-less gone away," said Duer in the televised interview on May 2. "So, it's kind of surprising. All of a sudden it's back on again?"

Duer said there is no evidence that the men responded in any way or represented themselves since 2021.

(Prior dockets show they did represent themselves in prior State Vet Board actions, Herr in 2010 while he was still milking his own dairy herd, and Wentworth in 2018 while he was employed as an AI technician by Select Sires.)

"They had not only a few opportunities to come forward and prevent this kind of an outcome, but those opportunities were multiple...," said Duer.

According to the unsealed documents, a Commonwealth Court judge signed "Orders to Commit" on October 6, 2023, which resulted in the April 2024 arrests.

The more immediate question is: Were they given the oppor-

LEHOUX VICTOR TOPAGE Supreme JC Roval Winter Fair '23 All-American Winter Yearling 2023 Topage is fresh and looks fantastic - she sells!

tunity to purge the contempt at the time of arrest and incarceration, as would appear to be the process with civil contempt, according to an ACLU or Pennsylvania guide to contempt proceedings.

The deeper questions center around the future: What will happen next in terms of a level playing field for smaller farms looking to gain the benefits of integrating ultrasound into breeding management, but are not large enough to have employees trained to do it or vet practices willing to station their vet techs at small farms to do it.

Of the NoBull customers who have contacted this reporter, nearly 90% want this integration, while they still intend to maintain their veterinary relationships through regular herd checks

A January 2024 Progressive Dairy article by a Genex consultant examined how integrating ultrasound with breeding management is revolutionizing reproduction on U.S. dairies that are faced with the need for swift information to make economic decisions in a highly competitive, tight-margin dairy business.

Owners of small dairy farmers continue to contact this reporter wondering what they can do about this. "How can we help?" they ask.

"I still lost cows when I grooved. Agri-Trac came in and changed that! This is real Traction for my cows! I noticed the difference right away! I liked it so much I had them come back and do the rest of my barns! No more grooving for us! Thanks Agri-Trac!"

– Unc Brock, Schaghticoke, NY

"AGRI-TRAC Traction Milling lasts and it won't wear! It works! | believe in it! No more slipperv floors! No more grooving every few years! AGRI-TRAC lasts far longer than grooving. No more lame or down cows!" - Jim Akam, Concord Valley Farms, Spartansburg, PA

"Agri-Trac works so good after they milled our floors our milk count went up 2lbs per day without changing anything else! You can see the confidence our cows have now when walking and running. No more down cows with grooving! Thank you AGRI-TRAC!" - Ron Deboover, Vince Deboover Farms, Geneva, NY

"We had slipperv floors and lost cows. Now my cows have real traction! This is a game changer for us. Thanks to Agri-Trac now our cows are happy. This is a game changer!" - Matthew Rohror, Rockingham, VA

"Right after my barn floors were milled we had real Traction for the first time since we started milking cows. I realized a 5lb per cow increase right off. My cows are completely different. I will never groove again! Thank you AGRI-TRAC!"

- Derrick Nop, Montgomery, NY

"AGRI-TRAC Traction Milling works 100%! I have grooving and it does not work! AGRI-TRAC milled right over my grooving and fixed it! I will stick to AGRI-TRAC in the future!" Robert Musser, Shippensburg, PA

CDE DAIRY MARKETS & MANAGEMENT UPDATE All prices - MAY 8, 2024 - except where noted

Alflafa Mixed hay

Dairy exports continue to slip: Dairy exports continued their up 0.1 percent from a year ago downward trend from 2023 in the first quarter of 2024. Total dairy ex- to 1.23 billion pounds, up 7.6 ports declined year over year in March, with total dairy export volumes percent from February. Italian dropping 4.5 percent to 527 million pounds, while the value of those type cheese production was exports fell 9.2 percent to \$740 million. The year-over-year decline up 4.4 percent from last year in March came on the heels of February's jump in total dairy export volume and values. Year to date, dairy export volumes are down 3.1 percent from 2023, while export values were down 10 percent in the first quarter.

spot in the dairy export market. March cheese exports were up 21 percent to 50,022 metric tons, marking the first time cheese volumes have ever reached 50,000 metric tons in a single month. Much of the growth in sales is coming from Mexico, with year-over-year shipments to our southern neighbor up 8 percent in March. This past month is the 33rd consecutive month of growth in cheese exports into Mexico. Shipments of US cheese to Japan, South Korea, the Middle East and North Africa, and Latin America were also strong in the month of March. With lower domestic cheese prices very competitive on the world market, March is the fifth consecutive month of year-over-year gains in total cheese sales overseas.

Nonfat dry milk and skim milk powder shipments overseas continue to slip, with March NFDM and SMP shipments falling 18 percent from a year ago. Powder exports into the Southeast Asia market were up 13 percent, while powder shipments into Mexico were down 37 percent. US Dairy Export Council is pointing to several factors contributing to the decline in overseas sales of NFDM and SMP sales, including a decrease in domestic production and stocks of Nonfat Dry Milk Powder. According to the latest USDA Dairy Products report, nonfat dry milk powder production was down 7.9 percent or about 12 million pounds in March.

Prices change daily. This market information is an example for educational purposes.

to 518 million pounds, while American type cheese production was down 2.9 percent to 491 million pounds. Butter production was up 1.4 percent from a year ago to 209 million pounds. Despite the increase in butter production, combined production of skim milk powder and Cheese sales overseas continue to be strong and remain a bright nonfat dry milk powder was down 14.5 percent from a year ago to 212.02 million pounds.

With cheese production basically flat from a year ago, both spot butter and spot cheese prices are up from a month ago. Butter prices hit \$3.02 per pound on May 7, up 10 cents from a month ago. Cheese prices have increased more significantly, with spot Cheddar block prices at \$1.8375 per pound, as of May 7, up nearly 40 cents from a month ago. Class III prices have also rebounded with the higher cheese prices.

USDA announced the April Class III price at \$15.50 per cwt., down 84 cents from March and \$3.02 behind year-ago levels. The April Class IV price was announced at \$20.11, up 2 cents from March and \$2.16 above last April. Class III milk futures, however, are up nearly \$3 from April, with May's Class III price currently trading at \$18.33 per cwt. The average Class III futures price for the remainder of 2024 is \$19.00 per cwt. Class IV has held steady, with the 2024 average Class IV futures prices at \$21.07 per cwt., as of the close of May 7 trading.

USDA announced last week that product testing has not detected any active Highly Pathogenic Avian Influenza (HPAI) virus in hundreds of samples of milk, cottage cheese, and sur cream. The Department also announced that it tested retail ground beef samples and found no active virus in those samples as well.

This continues to affirm that there is no concern about the safety The latest Dairy Products report shows total cheese output in March of the milk or meat supply related to the HPAI outbreak in dairy cattle. owever, it continues to be an animal health concern.

10 BROWN ROAD, SHIPPENSBURG, PA

Alson & Minerva Martin Herd Dispersal

★ The Martins made the difficult decision to sell their dairy herd and they're sending only the best! We are selling 30 Holstein cows includ-

ing several R&W cows as well as heifers from breeding age up to springers.

Well framed with great udder promise! These cows are averaging 75

Ibs. 4.1F 3.2P and low SCC, with mostly 1st and 2nd lac.! Great ud-

ders, feet and legs! The cows are A.I. sired using good feet and leg bulls,

with high components and good milk! Regular foot trimming program

with no sore feet! The Martins have a growing greenhouse business and have decided to sell their cows and heifers, which created this opportunity to put their best cows in your barn! Don't miss them!

We are expecting a good selection of fresh and fancy, 2 and 3 yr.

olds out of local overstocked herds and heifer growers. Many A.I. sired with several good Registered cows, with most on test w/low SCC

and lots of milk! Including five fresh cows from one farm fresh less

* Brandt-View sends five fresh and fancy cows w/ deep pedigrees

★ ALSO A NICE SELECTION OF HEIFERS FROM HEALTHY CALVES TO

★ Reg. Tog daughter sells due June 4! Dam VG-87 Andreas x EX-91!

★ 15b good framed, breeding age heifers from one farm! Mostly Holstein

EXCITING REAL ESTATE OPPORTUNITY!

296 Acres Gently Rolling Land 2/3 Productive Farmland, Balance Wooded To Be Offered In 3 Parcels And As Entirety 3/4 Mile Of Road Frontage, Adjoins Hueston Woods State Park One Hour From Dayton And Cincinnati, OH, Good Elevation Oxford Twp., Butler Co., Talawanda School District

Live Auction With Online Bidding

Absolute auction, all sells to the highest bidders on location: 6822 Morning Sun Rd., Oxford, OH 45056. Directions: From Oxford, OH take N. Main St. north, turns into Morning Sun Rd. (SR-732) for 10 minutes to auction OR from I-70 take exit 10/US Route 127 south to Eaton, OH then take SR-732 SW (approx. 15 minutes south) to auction.

Friday, May 17, 2024, 12:30 P.M.

Real Estate: 296 acres gently rolling land. The Delp family has had ownership for many years. The original farm home and buildings were demolished years ago, but the farm lane and park like setting still exist. Approx. 185 acres total of productive farmland (rented for 2024 season) balance of land wooded w/ a small lake and pond. Soils include Fincastle, Russell-Miamian, and Xenia silt loams. All mineral rights owned by sellers to transfer. Approx. 51 acres lays on west side of Morning Sun Rd. and adjoins Hue-

ston Woods State Park. Buyer to receive new survey. Land is a great investment you can enjoy and watch the sunset on. Convenient location, you better check it out! Land Offered As Follows:

Parcel #1: 6822 & 6896 Morning Sun Rd. Approx. 186.6 acres w/ approx. 1,800 ft road frontage. Approx. 125 acres tillable farmland. Original farm lane leads back to wooded area w/ small lake. Good elevation. Butler Co. parcels H3610002000013, 1000009, 1000008, and 1000007

Parcel #2: Morning Sun Rd. Approx. 58.2 acres. Approx. 49 tillable farmland, all in one field. Balance of land wooded. Over 1,800 ft road frontage (adjoins parcel #1) to the north. Parcel H3610001000024.

Parcel #3: 6807 Morning Sun Rd. Approx. 51.2 acres lays on west side of road. Over 700 ft road frontage. Front 19 acres tillable farmland. Rear 32 acres wooded w/ pond. This parcel adjoins Hueston Woods State Park. Parcels H3610002000011 and 2000012.

Note: Parcels to be offered bidders choice and as an entirety through a multi-par live auction process. It will be sold whichever way brings the most. This is an absolute auction, circle the 17th on your calendar and plan to attend this exciting event! Tent, chairs, refreshments and restrooms provided. Call auctioneer today for details on how to buy, financing, and using your current real estate to buy this land. Bank financing available to qualified buyer, Farm Credit Services, 937.533.4442.

Terms On Real Estate: 10% down auction day, balance due at closing. A 10% buyer's premium will be added to the highest bid to establish the purchase price. Any desired inspections must be made prior to bidding. All information contained herein was derived from sources believed to be correct. Information is believed to be accurate but not guaranteed. Property to be offered as a Multi Par auction and sold whichever way it brings the most.

Auction By Order Of: Delp Ellis Enterprises, LLC and Rose Land Enterprises, LLC Realtors/Auctioneers: Peter R. Kiko, Sr., 330.705.5996, peter@kikocompany.com and

Microbiology Nutrition with Smartbacteria

Stabilize the Rumen and Maximize Energy P-One, the microbiology, is fed daily and contains eight of our meticulously researched and developed Priority

Smartbacteria strains. These strains stimulate lactic acid utilization in the rumen and maintain a healthy population of beneficial bacteria in the lower intestinal tract.

OCEAN MINERALS[™] the Smartbacteria catalyzer TAILORED NUTRE

A proprietary combination of Seaweed derived ocean calcium, magnesium, and numerous other minerals act as a Smartbacteria catalyzer, thus creating the near perfect natural environment to initiate bacterial growth in support of Microbiology Nutrition.
