THE WEEKLY DAIRY FARM FAMILY MAGAZINE

### "Got fresh cows? Get Comfort!" Fresh starts pay back bigtime

Cow comfort is more important than ever in today's times of tight milk margins and reduced numbers of dairy replacement cattle. Protect your cattle

investments and capitalize on them. Help your herd reach its genetic potential with fresh starts that pay back dividends.

Nothing impacts cash flow like problem-free lactations and smooth heifer transitions. Got fresh cows? Get Comfort... with Udder Comfort!<sup>™</sup>

"Soft, comfortable udders that milk out quickly and completely have a big impact on milk quality and

performance," says Erik Hagedoorn, managing one of two Bos Dairies locations near Lovington, N.M., milking 5400 Jersey cross cattle and calving well over 30 animals daily. "We rely on Udder Comfort for routine use in our hospital groups and for our fresh cows at the start of lactation. When outdoor conditions decline, we increase our preventive use. It works like a charm." "We use Udder Comfort after each milking for 5 to 7 days after calving to remove swelling. This gets

udders softer faster for more milk. We saw better first-lactation performance in our 2-year-olds with a 3 to 4 pound production increase at 14 DIM, and a reduced SCC for the group," says Keith Beer, Beer Cattle Co., Berne, Ind., calving 250 heifers monthly. "We love how easy it is to do this in the parlor."

### UDDER COMFORT

**Quality Udders Make Quality Milk** 

For external application to the udder only, after milking, as an essential component of udder management. Wash and dry teats thoroughly before milking.

### <u>Free webinar on June 21</u> 'All you need to know about dairy markets'

HARRISBURG, Pa. – On Friday, June 21 from noon to 1 p.m., the Center for Dairy Excellence will host a "Protecting Your Profits" webinar with two special guests from Ever.Ag. The webinar is part of a newly revamped "Protecting Your Profits" series that will feature a different guest sharing various perspectives on dairy markets and risk management each month. Titled "Top 5 Things You Need to Know About Dairy Markets" and led by Valerie Mason-Faith, risk education manager at the Center, the June 21 webinar will feature Kathleen Noble Wolfley and Colin Kadis from Ever.Ag.

Wolfley and Kadis will provide an update on June 2024 dairy market conditions and focus on five key areas:

1. Milk production dynamics: Current production, cow numbers, margin expectations, replacements, etc.

2. Domestic demand: Retail promotional activity, restaurant traffic, and year-to-date consumption.

3. Dairy exports: Performance year to date and what we might expect for the second half.

4. Butter: High prices and an evaluation on whether these prices can last.

5. Macro markets: A look at US/global economic trends.

"We're looking forward to hearing Ever.Ag's thoughts on dairy market conditions so far in 2024. Our speakers are immersed in risk management every day, and they have excellent insight on market factors that are influencing the dairy industry and entire food supply chain," Mason-Faith said. "This webinar will also kick off our revamped 'Protecting Your Profits' webinar series, where we'll dive deeper into different areas of dairy markets and risk management each month."

During the webinar, Wolfley and Kadis also plan to share details about the Dairy Revenue Protection (DRP) program. With the last day to transfer agents being June 30, it will give listeners a chance to get informed on the risk management tool if they choose to add DRP into their risk management plan.

To join the discussion in a format that is most convenient for you, the Center will host it in a webinar, podcast, and conference call format. There is no cost to participate in the 'Protecting Your Profits' discussion, and no registration is necessary.

• Webinar format: Visit centerfordairyexcellence.org/JunePYP on Friday, June 21 at noon to launch the webinar and watch live.

• Conference call format: Call 1-301-715-8592 on Friday, June 21 at noon. Webinar ID: 897 3745 6061; Passcode: 945023

• Podcast format: Visit centerfordairyexcellence.org/pyp to listen to a recording of the "Protecting Your Profits" discussion and subscribe to get notified when new episodes are released. The episode is expected to be published after the live webinar is concluded.

Farmshine, Friday, June 14, 2024 — 3

McWilliams Goldchip Faster (EX-93) goes back to the Chief Faith family and was the winner of the Production Class at the Pennsylvania Spring Show last April.

McWilliams Sweet Emotion (VG-88) as a 2-year old, is also a daughter of Susan.

McWilliams Damion Grace (EX-94-2E) stood as the firstplace aged cow and honorable mention grand champion at the Pennsylvania Spring Show in April.

### **Determination drives McWilliams' show-winning herd**

By DIETER KRIEG Farmshine Editor

SOMERSET, Pa. — The Oxford English Dictionary defines prodigy as "a person — especially a young one — endowed with exceptional qualities or abilities.

Sam McWilliams, 29, has been around cows for all of his life and for reasons he can't explain himself ... he's got the gift of knowing how to breed the good ones. And then, finding sires to make the good ones better yet. He has been doing so since his mid-teens. Of the 65 cows in his barn, six are EX-94 and another six are EX-93. In all, he has 32 Excellent cows under his care. He bred most of them himself, while also purchasing a few as calves and developing them to their full potential. Not to be overlooked is that he has sold some high-point cows too.

"We turned the mating selections over to Sam when he was 15," said his mother, Charlene, acknowledging his exceptional ability. Four years later, he was exhibiting at the World Dairy Exposition, attracting the attention of breeders and exhibitors alike, many of whom are known nationally and internationally.

"Chris Hill and the late Michael Heath stopped in often," commented Sam, who hated school and quit after the 8th grade. He was totally more interested in working with cows, possessing an intensity that matches the dedication of yesteryear's renowned breeders and herdsmen.

Now, it's your turn to see the fast-rising McWilliams Registered Holsteins which have outclassed many competitors at recent Pennsylvania Holstein shows and beyond.

Sam and his mother, who fully shares in the animal husbandry workload at McWilliams Farm, will host the Pennsylvania Holstein Association's picnic on July 6th from 11 a.m. until milking time. All are welcome.

Aside from being able to see a herd of cows that boasts a BAA of 111.5, visitors can simultaneously "inspect" the new barn, which was completed a year ago. It features 32 free stalls on one end and six bedded-pack box stalls on the other. Each pen was designed for two cows. An attached perpendicular wing at the center houses a double-4 step-up milking parlor, utility room and spacious office.

Up the hill, amids several old and neglected buildings, there's a modern, open-air calf barn that was built 12 years ago. It, along with its occupants will likely also interest the anticipated crowd of Holstein enthusiasts.

Reservations for the event, which includes lunch, are due Monday, June 17, and may be made online at www.paholsteins.com

The Summer Sensations Sale will follow on the premises immediately after lunch, at 12:30 p.m. A pre-sale preview will

be hosted by the McWilliams family on Friday evening, July 5th.

The family owns 500 acres and rents another 400, which virtually assures that they can raise enough forages and grains for the herd. "We were milking as many as 165 cows here about 20 years ago and had to buy hay and straw," Sam reminisced. "I was big enough to help but not old enough to have any say," he grinned. "It's easier to milk fewer cows and farm more acres. I like both, but enjoy the cows the most."

"Mom and Dad (Clyde, deceased) moved here in 1987, after renting a farm in Westmoreland County for 6 years," Sam continued. "Our interest in Registered Holsteins was ignited during our youth when we both worked on dairy farms, explained Sam's mother, Charlene. "My grandfather, Ben Brown of Fayette County had some great cows which he showed," she noted with pride.

The result of that inspiring background was that they started with an all-around foundation that was pretty solid with ambition, attitude and goals. "We bought most of our cows from Terry Kuehn, Kirk Hillegas and Ron Wood," Charlene proudly revealed.

Not surprisingly, Sam breeds for type, the common strategy for a show-winning herd. Bulls from proven cow families are highly preferred, he said, naming Sidekick, Unstoppabull, turn to page 17

### Pa. announces voluntary bulk tank monitoring for bird flu

#### By SHERRY BUNTING Special for Farmshine

WASHINGTON – Bovine Influenza A / H5N1, known in birds and domestic poultry as highly pathogenic avian influenza (HPAI), has spread to dairy herds in three more states – Iowa, Minnesota, and Wyoming.

As part of emergency response plans, as many as 16 states, including Pennsylvania, are rolling out voluntary bulk tank monitoring programs as supported by USDA's May 31 announcement.

As of June 12, there are no detections of H5N1 in dairy herds and no active HPAI in poultry flocks in Pennsylvania.

The USDA APHIS website confirmed 93 detections in dairy herds in 12 states since March 25, of which 47 have been confirmed in the past 30 days in just eight states (in order of most recent detection): Idaho, Minnesota, Iowa, Wyoming, Texas,

Michigan, South Dakota, and Colorado.

Of the other four states, Ohio and North Carolina are beyond 60 days since detection. Kansas and New Mexico will be at 60 days on June 16.

During the monthly Center for Dairy Excellence call, Pennsylvania State Veterinarian Dr. Alex Hamberg said herd detections in other states have come primarily from "either sick cows or through epidemiologic tracing from positive farms. It appears this is still a single bird to cow spillover that occurred in late 2023 and was not found until early 2024, so it

spread out from there, and we're now trying to catch up," he said.

"Equipment, people, and cattle, that's how this spreads. I can't stress this strongly enough," said Hamberg. Iowa is testing cattle close to positive poultry operations to provide data on species transfer risk.

Hamberg announced a Pennsylvania bulk tank monitoring program, supported by USDA. "This will be voluntary. The goal is to provide data of the status of the virus in Pennsylvania, or more likely the lack of it," he said.

Fort Collins, Co 80326 testing program begins this week of June 14th, so that

testing can begin the following week. Those interested can email RA-Ag\_StateVet@pa.gov or call 717-307-3258. To complete a web form for enrollment directly, go to https://forms.office.com/Pages/ResponsePage.aspx? id=QSiOQSgB1U2bbEf8Wpob3rFK2-AXM3FAtfP5r1dhDmtURVpGTktQUjZDUkhQOUpMVUtDS1U1T0o1SS4u

"We also need this data

for quicker response time, and to protect nearby poul-

try farms. Even more important, is to provide a

platform to engage con-

cerned consumers and

stakeholders to show we

are addressing this proac-

tively, that we are looking

for it, that we have a plan,

have it under control, and

that pasteurized dairy

products continue to be

safe and wholesome," he

period is three weeks, during which bulk tank and

other samples will be

taken. After three consecu-

tive weeks of negative re-

sults, the dairy farm would

achieve enrolled monitored

herd status and continue

weekly bulk tank samples

thereafter to maintain that

while building it," he said,

noting early enrollment in the voluntary bulk tank

"We are flying the plane

The status-enrollment

explained.

status.

"We will then get back to you with an enrollment packet," said Hamberg.

Hamberg said the May Exhibition Quarantine Order does not go into effect unless HPAI reaches dairies in Pennsylvania. However, effective now: Dairies within one and a half miles of an HPAI-infected poultry flock cannot show dairy cows at fairs and shows. Currently, there are no active poultry infections in Pennsylvania.

Dr. Ernest Hovingh, director of the PADLS said testing is currently well under capacity and prepared to handle bulk tank monitoring. For PADLS updates, visit http://padls.agriculture.pa.gov/InnerPages/HPAICattle.html

For details from the CDE call, to hear a recording, and see links to resources, visit https://www.centerfordairyexcellence.org/hpai-industry-call/

### Heat stress in cows gets more thoroughly researched

CHAZY, N.Y. — The Northern New York Agricultural Development Program (NNYADP) reveals new research about heat stress in cows.

"This study provided a unique before-andafter opportunity to evaluate the impact of the installation of fans on animal well-being and performance during the short periods of heat stress that are common in northern New York and do not allow the time needed for cows to acclimate," says Katie Ballard, director of research at Miner Institute in Chazy, N.Y. She has overseen a number of NNYADPfunded dairy animal heat stress research projects.

Earlier NNYADP-funded research provided no-fans-in-use baseline data from that farm at which the farm management team in-

### Heifers wanted for big sale

STATE COLLEGE, Pa. — The heifer search is on! If you have extra dairy replacements to sell, the Pennsylvania Holstein Association wants them! They're looking for:

- Springers due August to October;
- Short breds due December to February, (great for exports);
- Ready to breed heifers; and
- Calves that are 5 to 10 months old.

"We want them because the market is hot"! says PHA's executive director, David Lentz. "We want dairy producers to take advantage of the market if they have surplus heifers. We can help by holding a "Know What You Buy" Heifer Sale on Friday, July 12, at 10:30 a.m. at the Pennsylvania Holstein Association Farm, 1806 River Road, Middletown, Pa.

To get in on this sale, please contact PHA at director@paholsteins.com or 717-329-9202. Bonus information to consider ... there is an extra payback for heifers that are tested negative for Leucosis; A2A2 heifers are in demand; and there is an extra payback for heifers that are tested negative for Leucosis; A2A2 heifers are in demand; and Sire Identification and/or Registered heifers are valuable with or without genomic tests.

### 'The Dairy Show' runs 24/7/365

MADISON, Wis. – *The Dairy Show*, World Dairy Expo's podcast, is available on Amazon Music, Apple Podcasts, Google Podcasts, iHeart Radio, Spotify and online at world-dairyexpo.com

New episodes of The Dairy Show are released on the second and fourth Tuesday of each month. Expo's podcast features a new guest on every episode discussing topics related to the global dairy industry.

"As the digital meeting place of the global dairy industry, Expo's podcast gives listeners a taste of Expo year-round," shares Katie **Contract Science State** Schmitt, host of The Dairy Show. "The Dairy Show focuses on a variety of topics ranging from cows to the colored shavings to cutting-edge technology while introducing different

guests to provide unique perspectives." Listeners span the globe, representing over 110 countries, all 50 U.S. states, and 12 Canadian provinces and territories. Some of *The Dairy Show's* most popular episodes include "Judging on the Colored Shavings", "Fitting and Grooming Dairy Cattle", "Just Talking Cows" and interviews with Expo Recognition Award winners.

stalled 51-inch variable-speed, auto-control fans in 2022.

The earlier on-farm heat stress abatement conducted by Miner Institute with NNYADP grant funding showed the impact of periodic and short duration environmental heat stress events on dairy cows, particularly on higherproducing cows under northern NY conditions. The data showed decreased milk production, changes in milk composition, decreased reproductive performance, and inturn to page 16

### Dairy Shrine honors Don Bennink of NoFla Holsteins

FORT ATKINSON. Wis. — The National Dairy Shrine has selected Don Bennink of North Florida Holsteins as their Distinguished Dairy Cattle Breeder for 2024. This award is given annually to a progressive dairy breeder who excels in managing their dairy herd based on sound genetic and business principles. Bennink established North Florida Holsteins near Bell, Florida, in 1980, and has been an icon of dairy genetics ever since.

Through work and research collaboration on his own farm, Bennink has played a fundamental role in advancing selection for functional traits. He has accomplished this through development of outstanding cows

and bulls and circulating his knowledge and perspective with other breeders through ge-

netics conferences and research facilitation. Between 1981 and 2021, more than 200 bulls carrying the No-Fla prefix have been enrolled with the National Association of Animal Breeders. During this time, Bennink also developed several key females that have heavily impacted the Holstein breed. Most notably, he bred the dam of Mr. T-Spruce Frazz Lionel-ET --- No-Fla Montross 42446-ET who traces back to at least five genera-

tions of North Florida breeding. Lionel topped the TPI list in April of 2022.

Additionally, No-Fla Matriarch is top-20 alltime among proven bulls with a PTA Produc-

tive Life of 7.3.

Bennink has also bred 55 Dam of Merit awardees and 11 Gold Medal Dams, nine of which have scored 94 points, and he's bred another 15 EX-93 animals.

Early on, Bennink recognized the importance of health and fertility traits in sustaining the profitability of the Holstein breed. His perspective in this area made him an ideal speaker and panelist at genetics conferences across the country.

Over the years, Bennink has paid close attention to protein percent, even though his home state is a fluid milk market where producers are not paid for milk protein. Through these efforts he explored beyond his own herd and noticed an opportunity to increase value within the Holstein breed.

One of Bennink's greatest contributions to the dairy industry has been his participation in research projects. Most recently, his meticulous record keeping was instrumental in assisting researchers from Penn State

University to identify early onset muscle weakness in Holsteins. Without his records from genotyped animals, it is likely that the defect would have remained undetected for some time. Regular collaboration with the University of Florida also helped advance the field of embryo transfer and IVF.

Nominators Andrew Steiner of Pine-Tree Dairy and Chad Dechow of Penn State University say: "We have

worked with Don as a fellow dairy cattle breeder and as a collaborator on many dairy genetics projects. We believe there are few breeders who have advanced the cause of breeding for efficient and profitable cows to the same extent as Don."

Bennink will receive the Distinguished Dairy Cattle Breeder award at National Dairy Shrine's Awards Banquet on Monday, September 30th in Madison, Wis. His portrait will then be displayed in National Dairy Shrine's Dairy Hall of Fame and Museum in Fort Atkinson, Wis.

### King Barn Dairy MOOseum in Maryland will host Heritage Days June 29-30

GERMANTOWN, Md. — The King Barn Dairy MOOseum, located at 17920 Germantown Park Drive, Germantown, welcomes visitors to the county-wide Heritage

Days program on June 29-30. The MOOseum began welcoming visitors in 2010. It marked the start of a museum dedicated to capturing the dairy history for Mont-

gomery County, Maryland. Years of dedicated work and effort went into securing the right for the nonprofit MOOseum organization to use the only surviving structure — the dairy barn — still standing on the former 350-acre

King dairy farm. The Department of Parks had purchased the King farm back in the 1960s with plans to feature the property as an example of a working dairy farm. That plan was aban-

doned when in 1998 the decision was made to use the site for the South Germantown Recreational Park best known today as the Soccerplex. With more than two

dozen soccer fields along with indoor and outdoor seating stadiums, the Soccerplex hosts soccer games and tournaments as well as other field sports throughout the year. It

is the most visited park in Montgomery County. The King dairy barn stands in the middle of all this activity reminding visitors that once there was an operating dairy farm with fields of grazing cows and crops. Not so today with hundreds of soccer players out on the carefully maintained soccer fields.

The MOOseum's 14th open season began on May 4th and it will continue to welcome turn to page 13

"Agri-Trac works so good after they milled our floors our milk count went up 2lbs per day without changing anything else! You can see the confidence our cows have now when walking and running. No more down cows with grooving! Thank you AGRI-TRAC!" - Ron Deboove Vince Deboover Farms, Geneva, NY

RI-IR

"I still lost cows when I grooved. Agri-Trac came in and changed that! This is real Traction for my cows! I noticed the difference right away! I liked it so much I had them come back and do the rest of my barns! No more grooving for us! Thanks Agri-Trac!"

– Unc Brock, Schaghticoke, NY

"Right after my barn floors were milled we had real Traction for the first time since we started milking cows. I realized a 5lb per cow increase right off. My cows are completely different. I will never groove again! Thank you AGRI-TRAC!" - Derrick Nop, Montgomery, NY

"AGRI-TRAC Traction Milling lasts and it won't wear! It works! I believe in it! No more slippery floors! No more grooving every few years! AGRI-TRAC lasts far longer than grooving. No more lame or down cows!" - Jim Akam, Concord Valley Farms, Spartansburg, PA

"AGRI-TRAC Traction Milling works 100%! I have grooving and it does not work! AGRI-TRAC milled right over my grooving and fixed it! I will stick to AGRI-TRAC in the future!" - Robert Musser, Shippensburg, PA

"We had slippery floors and lost cows. Now my cows have real traction! This is a game changer for us. Thanks to Agri-Trac now our cows are happy. This is a game changer!" – Matthew Rohror, Rockingham, VA

The Mid-Atlantic Brown Swiss Invitational Show on June 22 in Frederick, Md.

### Brown Swiss enthusiasts invited to enter their best

FREDERICK, Md. – An ivitation is extended to all Brown Swiss enthusiasts from near and far to participate in the Mid-Atlantic Brown Swiss Invitational Show. Hosted annually by the Maryland Brown Swiss Association it will be held on Saturday, June 22, starting at 10 a.m. at the Frederick Fairgrounds in Frederick.

The online show entry system link is: https://showman .app/shows#/mid-atlantic-brown-swiss-invitational-13a9/ Tammy Voegeli, a well-known and highly qualified judge

with experience on the national level, will place the classes. The showmanship judge will be Emily Yeiser Stepp from Leesburg, Va.

This year's show will once again be dedicated to Ronnie Heffner, who was a driving force behind this show's growth. The Youth Show shirts will again be sponsored by the Maddie Johnson Memorial Fund and the Deeter/Johnson families. They will also be giving some special awards in the showmanship contests.

Any interested youth may participate in Fitting and Showing in accordance with the age requirements, regardless of state resi-

dency. The class breakdowns are Novice; then Juniors: 8-10 years; Intermediates: 11-15 years; and Seniors: 16-21. The fitting and showing contest will be held the same morning of the show and will start at 8:30 a.m. Maryland hospitality and fellowship with other breeders and friends will be evident on Friday evening, June 21, with food and drinks in the dairy show ring starting at 6:30 p.m. All are welcome

> Class lists, show rules and other information can be found in the Showman App mentioned in the second paragraph, above, and on the Maryland Brown Swiss website: https://sites.google.com/site/marylandbrownswiss/ (Click on Invitational Show tab)

> The Show Committee consists of Emily Heffner, Jenna Lenhart and Joy Widerman. Do not hesitate to contact them if necessary.

### Holstein Association names Herds of Excellence winners

BRATTLEBORO, Vt. — Holstein Association USA's Herds of Excellence award recipients have bred and developed herds with superior production and type. This prestigious award, presented on an annual basis, celebrates exemplary Registered Holstein<sup>®</sup> herds that have met rigorous qualifying criteria with their 2023 records.

The award is broken down into three divisions based on herd size, including the Large Herd Division (500 + cows), Medium Herd Division (100-499 cows), and Small Herd Division (10-99 cows).

This year's honorees are:

• Large herd size (500 + cows)

Siemers Holstein Farms Inc. — The Siemers Family, Newton, Wisconsin, 8-year honoree

- 80.0% homebred; AACS 84.7 points ME averages: 34,042M 1543F 1057P
- Medium herd size (100-499 cows) Koester Dairy Inc. — The Koester Family, Dakota, Illinois, 8-
- koester Dairy Inc. The Koester Family, D year honoree
  - 99.8% homebred; AACS 85.2 points
  - ME averages: 34,013M 1519F 1086M
  - Small herd size (10-99 cows)
- Kal-side Holsteins The Oberholtzer Family, Hillsboro, Wisconsin, first-year honoree
- 94.0% homebred; AACS 85.8 points ME averages: 35,636M 1477F 1131 P

Doorco Holsteins—The Vandertie Family, Brussels, Wisconsin, 7-year honoree

visitors until October 26th on Saturdays from 10 a.m. to 3 p.m. and on the fourth Sunday of each month from 1 to 4 p.m. Admission is free. Additional information is available at www.mooseum.org

The MOOseum exhibits cover four themes: breeds that were popular with the County's very successful dairy farmers, scale model of the King farmstead and extensive display of period household items, dairy artifacts that demonstrate the progression from hand milking to the introduction of milking machines and robotic milking, and the transport ment and participation in youth events at the All-American Dairy Show.

Applications are due July 15th and can be found at. https:// www.allamericandairyfoundation.com/arthur-w-nesbitt-scholarship.html

This scholarship is awarded in honor of Art Nesbitt, former executive director of the Pennsylvania Holstein Association and retired chairman of Nasco.

of milk from the farm to the consumer.

Visitors learn about the 600-plus individual dairy farms that shipped milk at some point during the last 100 years and the rise of dairying as the leading industry in mid-1900s and the decline of dairying to just three dairy operations left in Montgomery County today. The MOOseum has something for all ages

with a room filled with books and farm style

**Box Culverts** 

#### 14 – Farmshine, Friday, June 14, 2024 U.S. Senate Republicans put whole milk in their farm bill framework

U.S. Senator John Boozman (R-Ark.), ranking member of the U.S. Senate Committee on Agriculture, Nutrition, and Forestry, unveiled the Senate Republican-drafted farm bill framework as a title-by-title overview and summary late Tuesday, June 11. In a press statement, the Ranking Member said it "answers the call for a farmer-focused farm bill."

Like in the House Ag Committee-passed farm bill, the Senate Republican farm bill includes bringing the choice of whole milk back to our nation's schools. It is listed among the 'other priorities' identified in XII as follows: "Providing additional options for students by allowing nonfat, reduced fat and full fat milk in school meals." We hope the full legislative language mirrors the House bill closely in all aspects.

The Senate Republican bill also increases authorization of funding for Dairy Business Innovation Initiatives that support the development, production, marketing and distribution of dairy products. Like the Senate Democrat's framework and the House Ag Committee bill, Boozman's framework makes improvements to Dairy Margin Coverage and requires biennial cost surveys by dairy processing plants.

Like the House Ag Committee bill, the Senate Republican framework directs the Secretary to modify the Class I mover to improve milk pricing formulas.

As for the Dairy Forward Pricing Program, the House Ag Committee bill extends it once again, but the Senate Republican framework makes it permanent. This has not been a much-discussed issue in the past; however, as more dairies become involved in forward contracting, questions of 'captive supply' emerge. The program allows forward contracted manufacturing milk to be pooled on Federal Orders without obligating the handler to pay more than the contracted price, even when it is below the FO minimum.

#### U.S. Dept. of Defense SLAM project to fund fermented protein, cultivated meat

According to the most recent issue of *Vegconomist*, the U.S. Dept. of Defense's manufacturing innovation institute, Bio-MADE, released a call for proposals to "develop sustainable

After running a 5K, no doubt about it, Jason Morrissey **Got Milk!**

890 N. Reading Rd. Ephrata, PA 17522 www.insuringyourfuture.com 800-422-8335 food and material solutions for military operations through its Sustainable Logistics for Advanced Manufacturing (SLAM) Project." With grants from \$500,000 to \$2 million, the SLAM project seeks to "address the causes or impacts of global climate change, including through fermented proteins (fake dairy analogs) and cultivated meat (lab created fake meat)." The National Cattlemen's Beef Association immediately condemned the DoD's research grant that will fund cultivated meat for the military. No word yet from dairy groups about the funding of fermented protein dairy analogs.

#### Cl. III milk futures up across the board

Class III milk futures moved higher again this week, pretty much across the board. The biggest gains were in the 2024 months, slight gains in 2025 contracts. Class IV was mixed and mostly lower. The biggest declines were in the fourth quarter 2024 months. On Wed., June 12, Class III milk futures for the next 12 months (Jun24-May25) averaged \$19.69, up 26 cents from the previous Wednesday. The 12-month (Jun24-May25) Class IV milk futures average was at \$21.38, down 21 cents from the previous Wednesday.

#### Spot cheese, whey higher

On the CME daily spot cheese market this week, blocks and barrels both moved higher with blocks back into the \$1.90s and barrels topping \$2.00. The 40-lb block Cheddar price was pegged at \$1.9375/lb on Wed., June 12, up 7 cents from the previous Wednesday. With 8 loads trading the first three days, the weekly average stood at \$1.9233/lb. The 500-lb barrel cheese price gained 7 cents, pegged at \$2.01/lb Wednesday. With 8 loads trading over three days, the weekly price average stood at \$1.9958/lb. Dry whey gained a whopping 4 cents, pegged at 48 cents/lb with just a single load changing hands Monday through Wednesday.

#### Butter firm, active powder market loses penny

The rollercoaster butter market wound up firm at midweek as the CME daily spot price pegged \$3.1050/lb Wed., June 12, up a penny from the previous Wednesday. The weekly weighted average stood at \$3.0967/lb., with 9 loads traded Mon.-Wed.

The powder market was extremely active again this week, trading 25 loads in the first three days with the spot price for Grade A nonfat dry milk (NFDM) pegged at \$1.19/lb Wed., June 12, down a penny from the rally on the previous Wednesday.

#### Weekly NDPSR mixed, trails spot market

Trailing the CME spot market on everything but barrel cheese, the weekly National Dairy Product Sales Report (ND-PSR) for week ending June 8, reported the weighted averages of these Federal Order formula commodities as follows: Butter \$3.0713/lb, NFDM \$1.1664/lb, 40-lb block Cheddar \$1.9176/lb, 500-lb barrel cheese \$2.0569/lb, and dry whey \$0.4106/lb.

### May blend prices mixed, Upper Midwest

**gets some relief from improved Class III price** Federal Milk Marketing Order Statistical Uniform Prices (SUP) for May showed uneven trends. May milk settlement checks recovered in the Upper Midwest and California, where dismal cheese prices had driven Class III milk value down into the abyss for those producers in the first four months of the year. The SUP in FO 30 and 51 saw welcome gains, finally, of \$2.79 and \$2.06, respectively in May vs. April. The Southwest (FO 126), with substantial Class III assets saw the blend price gain \$1.67 per hundredweight. Other multiple component pricing FOs made gains ranging from 71 cents in the Northeast to \$1.44 in the Central U.S.

The Class I markets saw gains in April when other marketing areas had losses. For May, the Appalachian Order is near steady vs. April, while the Southeast is off 19 cents and Florida down 48 cents. May 2024 FO SUP's (at 3.5% BF) and PPDs were announced June 12 as follows:

inounced June 12 as follows.						
FO	<b>BLEND</b>	<b>CHANGE</b>	PPD	<b>CHANGE</b>		
Florida (6)	\$23.46	-0.48	N/A	N/A		
Southeast (7)	\$22.08	-0.19	N/A	N/A		
Appalachian (5)	\$21.77	-0.03	N/A	N/A		
Northeast (1)	\$20.89	+0.71	+2.34	-2.25		
Southwest (126)	\$19.89	+1.67	+1.34	-1.38		
Mideast (33)	\$19.45	+1.18	+0.90	-1.87		
California (51)	\$19.40	+2.06	+0.85	-0.99		
Central (32)	\$19.14	+1.44	+0.59	-1.61		
Upper MW (30)	\$18.74	+2.79	+0.19	-0.26		

#### Last call to support Whole Milk champion GT in June 19 fundraiser event

"GT has been a friend to those who produce our nation's food and those who consume it. He understands dairy and agriculture. He has been a dedicated champion for the Whole Milk for Healthy Kids Act. Now is the time to come together to help make sure he and others who share these values are elected and re-elected to the Congress," says retired businessman and dairy advocate Bernie Morrissey. He is co-chairing an important fundraising reception in honor of House Ag Chairman and Dean of the Pennsylvania Congressional Delegation, Rep. GT Thompson on Wed. evening, June 19 at Yoder's Restaurant in New Holland. Pennsylvania State Rep. John Lawrence, author of the Whole Milk for Pennsylvania Schools Act will also be an honored guest. To contribute, mail a personal check made out to Friends of Glenn Thompson, c/o Bernie Morrissey, 4 Austin Drive, Robesonia, PA 19551. These contributions are not tax deductible. Those wanting to attend or purchase a table or seats, please see the ad on page 13, or call Bernie 9 a.m. to 9 p.m. at 610-693-6471.

On hot Summer days, a cool smoothie or milkshake hits the spot.

Sunrise Fruit Smoothie Yellow layer-3/4 cup water 1 frozen banana 3/4 cup frozen pineapple Red layer-3/4 cups water 1 frozen banana 3/4 cup frozen strawberries Blue layer-3/4 cup water 1 frozen banana 3/4 cup frozen blueberries

Place ingredients for the red layer in the blender. Blend until smooth. Pour into 2 or 3 glasses depending on the size. Rinse blender and repeat for each additional layer. To achieve the layered effect, pour the smoothie over the back of a soup spoon. Serve immediately.

### Chocolate Banana Milkshake

2 frozen bananas

8 tablespoons powdered chocolate 3 cups milk

1/2 teaspoon vanilla

Place frozen banana in the blender. Add remaining ingredients. Blend until smooth. Pour into glasses and serve. Top with whipped cream if desired.

Coffee Milkshake

1 cup cold brewed coffee 4 scoops (about 3 cups) vanilla ice cream Whipped cream for topping

Blend coffee and vanilla ice cream in a blender until smooth. Add a little milk if it is to thick and a little more ice cream if it is too thin. Pour into glasses and top with whipped cream.

Good-For-You Green Smoothie

1 apple, peeled and cored 1/4 cup ground flax 1/2 cucumber or zucchini 3-4 ripe bananas 2 handfuls spinach or kale

2 tiny sprig basil

Mix yogurt, pineapple juice, cucumber, and apple in the blender until smooth. Add remaining ingredients. Blend until smooth. Taste- add a little honey if needed. Leftovers can be stored in the fridge.

Composite Housing, Composite "Ultra Shutter"

We salute dairy farmers during June Dairy Month and all year long!

1 1/2 cup plain, unflavored yogurt 1/2 cup pineapple juice, or milk

Figure 5. Average milk production per cow per day shipped from the farm before (2019) and after (2023) installation of fans. Effectiveness of Fans for Heat Stress Abatement on Lactating Dairy Cows in NNY project, NNYADP, 2023.

### Heat stress

creased rates of lameness during the episodic heat events.

The data collection includes environmental temperature and relative humidity, reticular temperature of the cows in the study, lying and standing time, lameness, bulk tank yield and milk composition, and measures of reproduction performance.

"In our earlier projects, improving air movement on one farm resulted in an hour more of lying time by the cows. One hour of increased lying time has been equated to the opportunity to gain 2 to 3.5 pounds more milk per cow per day," Ballard explains. "Our date in 2023 in terms of lameness, milk production and composition, and reproduction impact clearly showed the economic value from the use of fans."

\_ from page 5

The economic impact of climatic heat stress alone on the U.S. dairy industry was estimated at \$900 million in annual losses in a research report published by R. J. Collier et al. in the ADSA Journal of Dairy Science in 2006.

The NNYADP-funded research over time suggests the question of whether recommended windspeed to increase animal comfort and mitigate the physiological impact of heat stress on dairy cows in northern New York needs to be increased over current recommendations.

### Youth award nominations invited

With Fans (2023)

HARRISBURG, Pa. — The All-American Dairy Foundation is welcoming nominations for the Robert D. Heilman Youth Achievement Award which will be presented at the 2024 Premier National Junior Show to be held on September 16.

This award recognizes an outstanding youth passionate about the dairy industry who works hard, helps others, and maintains a positive attitude regardless of the circumstances.

The Foundation desires to recognize a youth whom people may not always notice, who does not always win big awards, but

takes in the whole experience and is always learning and improving. To be eligible, nominees must be 16 years old and must have participated in youth activities in at least three prior All-American Dairy Shows. The award recipient will receive a check for \$500 and a plaque.

Farmshine, Friday, June 14, 2024 — 17

McWilliams Warrior Raine (EX-92) was named grand champion at the Pennsylvania Holstein Association's Spring show in April, then went on to place second at the New York Spring Show. She was bred by Sam and sold as a heifer to Scott Yocum and Katie Darnell, but is boarded where she was born.

McWilliams Capital Z Susan (EX-94-2E) is the dam of McWilliams Shakira Red, who placed first in her class and stood as honorable mention junior champion at last year's World Dairy Exposition. Since then, she captured the junior champion title at the Western Dairy Expo held in Saskatoon, Saskatchewan in April.

### Determination \_\_\_\_\_ from page 3

Lambda and Lambda sons as among his favorites.

"We like to keep the old cows around and get daughters out of them, he added. Naming two stand-outs, they are McWilliams Damion Grace (EX-94-2E) and McWilliams Warrior Raine (EX-92).

In-vitro fertilization (IVF) has doubled his heifer crop, which is key to his merchandising ambitions. "We sell about 50 head a year," he noted. He remembers being in Madison with a spring yearling 10 years ago. "People took notice," he said with a smile. What's more, the price was right and he sold her. "She's been sold five times since then," he added, "each time for more money."

Simplicity was an important consideration for Sam when the new barn was built. Therefore nothing is automated. He designed the barn himself after seeing several examples on

a guided tour, courtesy of Dennis Graham of Graham's Dairy Supply in Greensburg, Pa. Not being gifted in the drawing of blueprints, he got Michael Creek of Palmyra Farm, Hagerstown, Md., involved with that task.

Asked why he didn't include robots in his new barn, Sam's reaction was almost as though he had been insulted. He is a cow man and showman, after all. As such, he prefers his hands-on approach. "I want no parts of a robotic milker ... my show cows are the reason," he declared. "I don't think they go well together."

This year's PHA picnic is the first one to be held since the Kline Family hosted it at their well-known Klinedell Farms near Myerstown in 2017.

Why host the picnic? Sam says he had no choice. After having earned abundant recognition for his calves, heifers and cows at last year's All-American Dairy Show in Harrisburg, Lolly Lesher of Way-Har Farms approached him and suggested the idea. "She told me I had no choice," he laughed, jokingly adding "blame it on her!"

What words of advice might he have for others, particularly young people?

Answering modestly, he said: I guess I always thought stay determined. When someone tells me I can't do something or it won't happen ... work twice as hard to prove everyone wrong and reach goals and always set bigger ones."

Most noteworthy about this picture is that there are two manure alleys ... one where the cows are standing and the other on the far side. In between those two lanes are the box

stalls (near) with freestalls in the distance. The wide feed alley makes for easy and efficient delivery of rations. Nothing in the barn is automated.

Simplicity was what it was all about for Sam Williams when he designed the barn. He's more than pleased with the improvements it offers, especially compared to the old barn.

"Ventilation is so important!" he declared, "as is cow comfort". The barn offers both, not to mention other benefits. Barn photos by Dieter Krieg

The 12-year old calf facility has given hundreds of calves a great start to success. The majority of calves are sold to other Holstein enthusiasts.

Merchandising is an important part of the program for Sam, who prefers to sell the best.

### CDE DAIRY MARKETS & MANAGEMENT UPDATE All prices — JUNE 12, 2024 — except where noted

Employee risks on the farm: As the dairy industry navigates HPAI what that cow needs to succeed cases now on more than 80 dairy farms in 11 states, one issue to come on the farm – a comfortable, increasingly more in focus is workplace safety. Three cases of HPAI in well-ventilated place to rest, a workers have now been documented, with the most recent leading to respiratory illness and not just infection in the eyes. USDA and FDA are working with state agencies to document what personal protective equipment (PPE) should be worn to keep workers safe around cows showing chronic signs of the illness. Pennsylvania is working with a dairy advisory group to look at what PPE could be made available to producers to address this concern.

The concern around worker safety is not new. The last modification of the National FARM (Farmers Assuring Responsible Management) Program – FARM 4.0 – added a module on Workforce Development to provide guidance and best practices for farms to follow. With the addition of this module, FARM does require both farm family members and farm employees to receive training in different areas of animal care. The Workforce Development Module can also help farms walk through the different protocols and documents that should be in place to keep your employees both safe and engaged in succeeding on the farm.

Things like job descriptions, a new employee orientation and onboarding checklist, an employee handbook, anti-discrimination and harassment policies, a process to air grievances, training records, performance reviews, an employee housing inspection checklist, written safety plan templates, and a safety walkthrough checklist are all available through the module. That's because the National FARM team recognized how much these resources are needed as dairy farms grow. What often happens is, as herd sizes grow, excellent cow managers suddenly find themselves managing people, which requires a different skillset and toolset than to manage cows. There are some commonalities.

A really good cow manager pays attention to herd health and works to provide individual cow care, whether that is through walking pens every day and paying attention as they work with each group, or by using one of the many activity monitoring systems to track rumination, heat activity, and other vitals. When they see a cow showing signs of illness or struggling, they assess what the issue is and develop a plan to help the animal recover or move on. They also make sure they provide

balanced ration, cooling in the summertime, medical care, and

consistency in their routine. A good cow manager also knows that cows want to feel safe in their environment, so they provide that safety by acting in a calm manner and addressing potential hazards.

If you relate those same principles to worker safety, there are a lot of similarities. Taking the time, through regular one-on-ones and ongoing communications, to know your employees and understand their motivations and needs is like walking the pens and paying attention to the herd as you milk them and feed them every day. While cows often communicate how they are feeling visually, people are not always as transparent. Unless you ask them, often you do not know where your employees are struggling.

You provide the foundation for their success by having clearly written job descriptions that outline expectations and providing them with training and support they need to succeed. If an employee is struggling, you develop a plan to help them improve, whether it is through coaching them or providing more specific expectations. That's like a treatment plan for a cow who is struggling. When you are coaching an employee, you do regular check-ins to make sure they are moving forward positively, just like you check the cow regularly to make sure she is responding to the treatment plan.

Providing worker safety is also like providing safety for your herd. Do you have a harassment and anti-discrimination policy posted so employees know their rights? Do you make sure any employee hazards are addressed and safety protocols are in place? Are you training your employees to make sure they know how to stay safe on the farm? Are you providing the proper equipment to stay safe – like seat belts on equipment, eye protection and gloves to deal with chemicals, or ladders and safety harnesses for higher places?

To learn more about how to mitigate risks related to worker safety and employee management, National FARM has a whole section dedicated to this area. Go to nationaldairyfarm.com/dairy-farm-standards/ workforce-development/. If you want help finding additional resource

**ADANE** offering coaching in PR

SYRACUSE, N.Y. - With summertime activities starting, American Dairy Association North East (ADANE) is offering free online "Customized Communications Coaching" workshops for dairy farmers and dairy advocates to prepare for conversations with consumers about dairy.

"As dairy farmers and industry representatives, we will have the opportunity to stand up for dairy at many consumer events during National Dairy Month in June, and at fairs and festivals all summer long," said ADA North East CEO John Chrisman, "We're offering three coaching workshops to help you prepare for consumer conversations using consistent, accurate information so you can tell people what you want them to know about dairy."

Upcoming workshops are:

Wednesday, June 19, from noon – 1p.m. Wednesday, July 17, from 10 -11 a.m.

Register here at least one day before each training: //us02web.zoom.us/meeting/register/tZMvceuhrDovHdXI8tXCl-lxBxJFR8P6 ovSQ#/registration

The unique training experience will feature the latest communications tools, trends and data and focus on key messages to help answer tough questions. Key messages address animal care, environmental stewardship, and the nutritional value of dairy and are packaged to provide easy talking points.

Participants will receive tips and tricks to handle all situations and to find the right words that will resonate best with consumers

"Our highly skilled team brings a combination of practical on-farm experiences coupled with decades of consumer-facing communications backgrounds," said Chrisman. "They look forward to working closely with farmers and dairy groups who are ready to step up and advocate for dairy."

### How to get more out of your herd

Cornell QMPS has proven you can get more from your herd more staph and more beef. They started with 30 cows and 5 confirmed cases of staph and then milked the 15 cows with no staph with a GEA system and milked 15 cows with 5 cases of staph using CoPulsation<sup>tm</sup>. When they finished the GEA group created 16 new cases while only one new case with CoPulsation<sup>tm</sup>. Cornell reported a few cows died along the way - something many who milk with conventional systems experience routinely. Now Cornell and your dealer tell you our technology doesn't work - if Staph is your goal it most certainly does not work. They will try to sell you a vaccine to compensate for your milking system however that works about as well as the covid vax. McDonald's needs dairy beef - how many of your good cows do you want to become a Big Mac?

607-849-3880 TridentPulsation.com

Showtime yearling, also an 8-23 born Rene-

gade out of Tattoo. Dam is a VG-87 Blake, then 15 EX dams back to "Audrey Posch."
