Congress is failing American farmers; numbers prove it

WASHINGTON, D.C. — American Farm Bureau Federation President Zippy Duvall commented on September 5th on USDA's net farm income data, which shows a 23% drop in on-farm income since 2022.

"The drop in net farm income is not just an economic hiccup, it's evidence of an agricultural downturn. High inflation, severe weather and plummeting crop prices should serve as a wake-up call for Congress to finally step up and do the right thing by modernizing the farm bill.

"We've lost 141,000 farms in five years — is Congress going to wait to act until we lose another 150,000 or 300,000? It has been two years of kicking the can down the road when it comes to the farm bill, and there is no road left for some farmers in light of the current economic realities and antiquated safety net programs. Con-

Zippy Duvall

gress is failing America's families, not just on the farm, but in every home that relies on the safe, affordable food grown by the men and women who work year-round to provide it.

"It's been more than 100 days since the House Agriculture Committee passed a bipartisan bill that addresses the needs of farm and ranch

families. Since then, there has been no action in either chamber. I call on our elected leaders to show they are capable of putting politics aside—as they have in the past—to pass a new modernized farm bill. It can be done. It must be done."

Even when net farm income was higher, more than half of the farms in the U.S. were not profitable, according to the 2022 Census of Agriculture. Currently, farmers are paying the highest dollar amount ever on interest, labor and taxes based on today's USDA report.

ALL-AMERICAN DAIRY SHOW

Steve Cornman named recipient of the 'Obie' Award

HARRISBURG, Pa. — Four distinguished individuals will be recognized this year for their contributions that have shaped the All-American Dairy Show into what you see today. Steve Cornman of Boiling Springs, Pa., is among them and will be honored with the Obie Snider Award. It's the highest honor bestowed by the show. His father, Creedin, was awarded the prestigious prize in 2005.

The Obie Snider Award, established in 2004 in memory of Obie Snider, a founding father of the All-American Dairy Show, recognizes an individual who places significant value on service to the dairy industry and community, and who displays high standards of conduct.

This year's recipient, Steve Cornman, has

been manning the milkhouse at the All-American Dairy Show for over 20 years. A retired dairyman and milk inspector for 18 years, Steve spent many years at the All-American Dairy Show exhibiting with his family under the Justa Beauty prefix. In addition to his work in the milkhouse, Steve has served on the show's advisory committee for many years and was honored with the 2013 Image Award. In recent years, he has taken on the role of ring man for the Ayrshire show. He cherishes the friendships

Steve Cornman

he has made over the years at the show.

Steve attended Delaware Valley College and graduated in 1976 with a degree in dairy husbandry. After graduation, he moved to California, where he worked as an assistant herdsman at Producers Dairy for six years. Steve was a 4-H leader for over 20 years and was inducted into the Shippensburg Dairy Hall of Fame. He also served on the Cumberland County advisory committee, the 4-H advisory committee, Pennsylvania Junior Show

advisory committee for the South Central region, and several Pennsylvania Holstein convention committees. As part of a county dairy promotion, Steve even brought a cow to school to educate students about dairy farming.

Now retired, Steve spends his time helping Pennsylvania Holstein breeders and works part-time on the grounds crew at a local school district.

Steve and his wife, Debbie, currently live in Boiling Springs, Pa. They are the proud parents of two children, Rebecca Daubert and Aaron Cornman. Rebecca and her husband, Jeremy, have two children, Hayley and Trey Daubert, while Aaron and his wife, Lisa, have a son, Ben Cornman.

Diane Cashell named winner of AADS Image Award

HARRISBURG, Pa. — Diane Cashell of Shippensburg, Pa., has been selected to receive the All-American Dairy Show's prestigious Image Award. She is among four distinguished individuals who will be recognized this year for their contributions that have shaped the All-American Dairy Show into what you see today. The other three are Steve Cornman of Boiling Springs, Pa., Jessica Spangler of Lebanon, Pa., and Kristy York-Morse of Canton, Pa.

The Image Award is presented each year to an individual who has enhanced the image of the All-American Dairy Show through notable contributions to its reputation, prestige, and welfare.

"Diane has been a guiding hand to many volunteers and workers with the show. With

all Diane's years of volunteering and caring, she has become a personal friend to many by sharing her knowledge and experience, helping others to develop their strengths," said Helen Zimmerman, one of the 2023 Image Award recipients. "We are proud to call Diane a friend. I know very few people who are more dedicated to the All-American Dairy Show than Diane."

Diane has been a key member of the Decorating Committee at the All-American Dairy Show for over two decades. Starting in 2000, she

Diane Cashell

began assisting with the complex task of housing cattle for the show, which involved organizing over 400 stalling requests by hand. Diane's initial decorating efforts began modestly with the old dairy office; she and her team expanded their work to include decorating the large and small arenas and the banquet area.

With the expansion of the Farm Show Complex, Diane played a pivotal role in decorating the new dairy office, adding comfortable touches like rocking chairs and a bench.

Diane grew up on a dairy farm in Tioga County and now lives in Shippensburg, Pa., with her husband. She has three children and four grandchildren. She began working for Pennsylvania DHIA in 1978 and was later employed by Lancaster DHIA. Diane also served as a 4-H leader, assisted with fundraising for the Junior Dairy Club in Tioga County, and served on the All-American Foundation Board.

"I want to thank everyone I have had the pleasure of working with — Michelle Cornman, the late Denise Whiting, Sandy McCauley, and Betsy Musser," Diane said. "A special thank you to Jimmy Weller, and Loren and Helen Zimmerman for all of your ideas, purchases, and the time you dedicate to the All-American Dairy Show."

Youths 15-18 invited to a leadership conference

PLATTEVILLE, Wis. — Advance registration is required and must be received by Sunday, Sept. 15, for the Stride® Youth Leadership Conference, presented by Professional Dairy Producers® (PDP). The event is designed to provide high school students with the skills, confidence and inspiration to step into leadership roles while preparing for their future and learning about opportunities in the dairy and agriculture sectors.

The one-day leadership conference, to be held at the University of Wisconsin-Platteville on Saturday, Sept. 21, is for students ages 15 to 18. The program will feature interactive leadership training, campus farm tours and hands-on experiences. The conference will begin at 9 a.m. and conclude at 6:15 p.m.

"Stride is the perfect fit for high school students looking to build and strengthen their leadership skills while exploring potential opportunities in agriculture," said Amber Caferty, PDP marketing and development coordinator. "We're excited to have Michael Hoffman returning as our program facilitator. His interactive, high-energy style is so well received by students – they're engaged throughout the entire day and inspired to put their skills to work in their schools and communities after the conference."

Hoffman, founder and owner of Dallas-based Igniting Performance, Inc., will facilitate the conference sessions to introduce leadership styles and develop skills, some of which include:

- How to assess what's happening and what needs to be done
- How to know when you should take charge
- How to provide constructive feedback to others
- The level of your impact on other people's leadership development and growth

The UW-Platteville location will provide attendees with the opportunity to interact with researchers and graduate students during tours of the campus, farm and dairy foods lab. Participants will also visit a lab featuring bio-char research and learn about its potential in the field of nutrient management.

Follow along digitally in advance of and during the event by following @dairyPDPW on Facebook, Twitter, Instagram, and LinkedIn.

"Cows love Udder Comfort. So do we."

(Left) Ms Beautys Black Velvet-ET EX96 at 2022 World Dairy Expo, Res. Sr., HM Grand, 2x Bred-Owned Champion. Carl Saucier Photo (At, right) Black Velvet at 2024 Wisconsin Summer Championship, after winning 1st Production Cow, Best Uddered, Bred and Owned, Senior, and Grand Champion. She is bred and owned by Triple T, Vierra Dairy, and Duckett Holsteins, Rudolph, Wisconsin. Duckett Holsteins is home to Black Velvet, Footloose and other elite cows. Triple-T had a top 2023 BAA of 115.6 and is home to Vierra Dairy's show string with four World Dairy Expo Grand Champions.

"We use a lot of Udder Comfort.™ It's great for our fresh cows at home and keeps the udder quality while showing," says Mike Duckett, Duckett

Holsteins, Rudolph, Wis., home to Ms Beautys Black Velvet-ET EX96, owned by Duckett, Vierra Dairy, and Triple-T. Mike and Julie Duckett provide her daily care. She won it all recently at the 2024 Wisconsin Summer Championship.

Both the Ducketts and Thomases have had their own Grand Champions and All-Americans over the years. They pursue genetic excellence and enjoy raising their children in this life they love, breeding, milking, and caring for elite dairy cattle.

Much more cheese in dairy's future

AFBF economist gives financial conference attendees a lot to think about

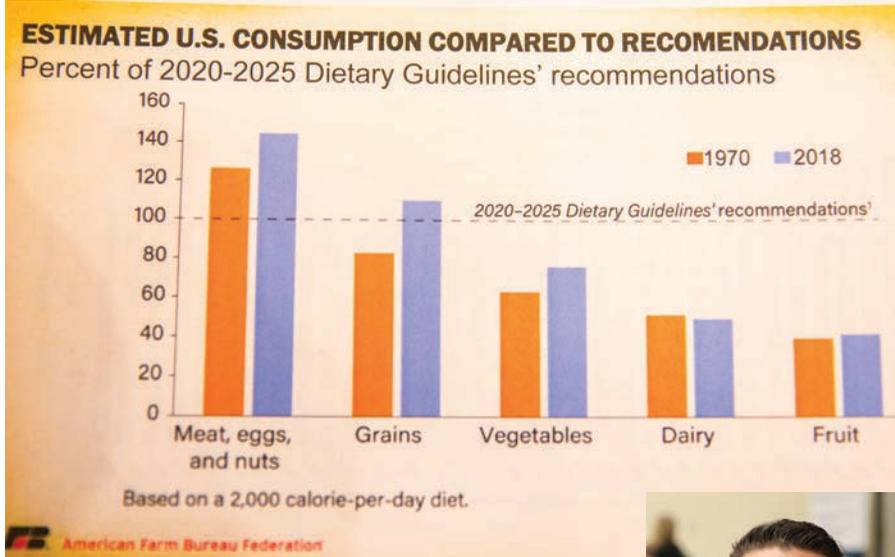

BY SHERRY BUNTING
Special for Farmshine

HARRISBURG, Pa. — Dairy trends are changing in form and function, driven in part by the \$300 to \$400 billion gap between eat-at-home dollars and the increasing dollars spent eating away from home. This has helped drive cheese consumption higher as fluid milk (beverage) consumption has waned — although year to date 2024 fluid milk sales have stabilized so far in 2024, up slightly year over year, according to American Farm Bureau economist Danny Munch, keynote speaker at the Center for Dairy Excellence “Future Proof your Dairy” Financial and Risk Management Conference on Wed., Sept. 11.

The conference drew 100 dairy lenders, consultants, industry representatives and producers to Harrisburg, where speakers also covered succession planning and the state of Pennsylvania’s dairy industry, along with a panel of dairy producers talking about the importance of innovation on dairy farms into the future.

The theme for Munch’s dairy supply and demand outlook was “Expecting the Unexpected.” He gave everyone something to think about as he detailed some of the emerging or potential transportation disruptions that could affect global markets for all agriculture commodities — inputs and sales. While the Canadian railroad strike is halted, for now, as the government stepped in; the labor unions have sued. Munch also cautioned of a potential longshoreman strike that could affect some ports in the future, as well as drought affecting Mississippi River levels that could impact barge travel and a similar issue emerging for the Panama Canal. Geopolitical factors could also affect other routes for global trade.

Munch stressed how vital access to export markets is now and will be even more so in the future for dairy with “tremendous” new

This chart had people talking as AFBF economist Danny Munch identified the big opportunity for dairy is consumers still only meet half the DGA recommendation. They are looking for easy ways to consume more protein.

cheese capacity coming online in the next two years.

Cheese production is still outpacing consumption, and the longterm trendline on ending stocks keeps ticking higher, Munch demonstrated with graphs.

“We keep hearing about the new investments in even more cheese plant capacity coming online 2024 through 2026 and into 2027,” said Munch. “We keep adding more cheese, at what I think is too high a rate. Where will we put it all. We will need access to foreign markets (and smooth routes of transport).”

Other than exports, one key area for growing future demand for cheese and other dairy products is the estimated gap between U.S. dairy consumption and the 2020-25 Dietary

Guidelines’ dairy intake recommendations.

“Americans are consuming less than half of the recommended amount of dairy,” said Munch. “There is a lot of opportunity there for dairy.”

Another plus for dairy on the demand side is that consumers are looking for easy ways to consume higher amounts of protein.

Munch touched on the USDA’s proposed changes to the Federal Milk Marketing Orders, and the referendum process expected in early January.

“Each Federal Order will vote individually,”

he said, “and a yes vote means the Order continues with the recommended changes. A no vote means producers believe the Orders aren’t working as they are now and they won’t work with the changes either, so the Order is terminated.”

Looking to the future of American agriculture, Munch noted the U.S. is the most efficient producer in the world, but continued innovation will become even more important heading into the future as other countries shift from clearing land to increase their output to using more technologies that increase their efficiency too.

On the cattle inventory and beef markets, Munch said that while the dairy cattle herd is the smallest since before 2020, the beef cattle herd is at an 80-year low. AFBF surveyed farmers and ranchers, finding that only 14% of respondents plan to increase their beef cattle herds, while others expect to liquidate further.

The beef industry had a smaller calf crop this year, which also limits expansion, but drought across key parts of cattle country, along with water access conditions are also having an impact on beef herd rebuilding.

“Dairy producers are taking advantage of this with beef on dairy as an alternative income stream. The supply vs. demand for beef has this deficit,” said Munch.

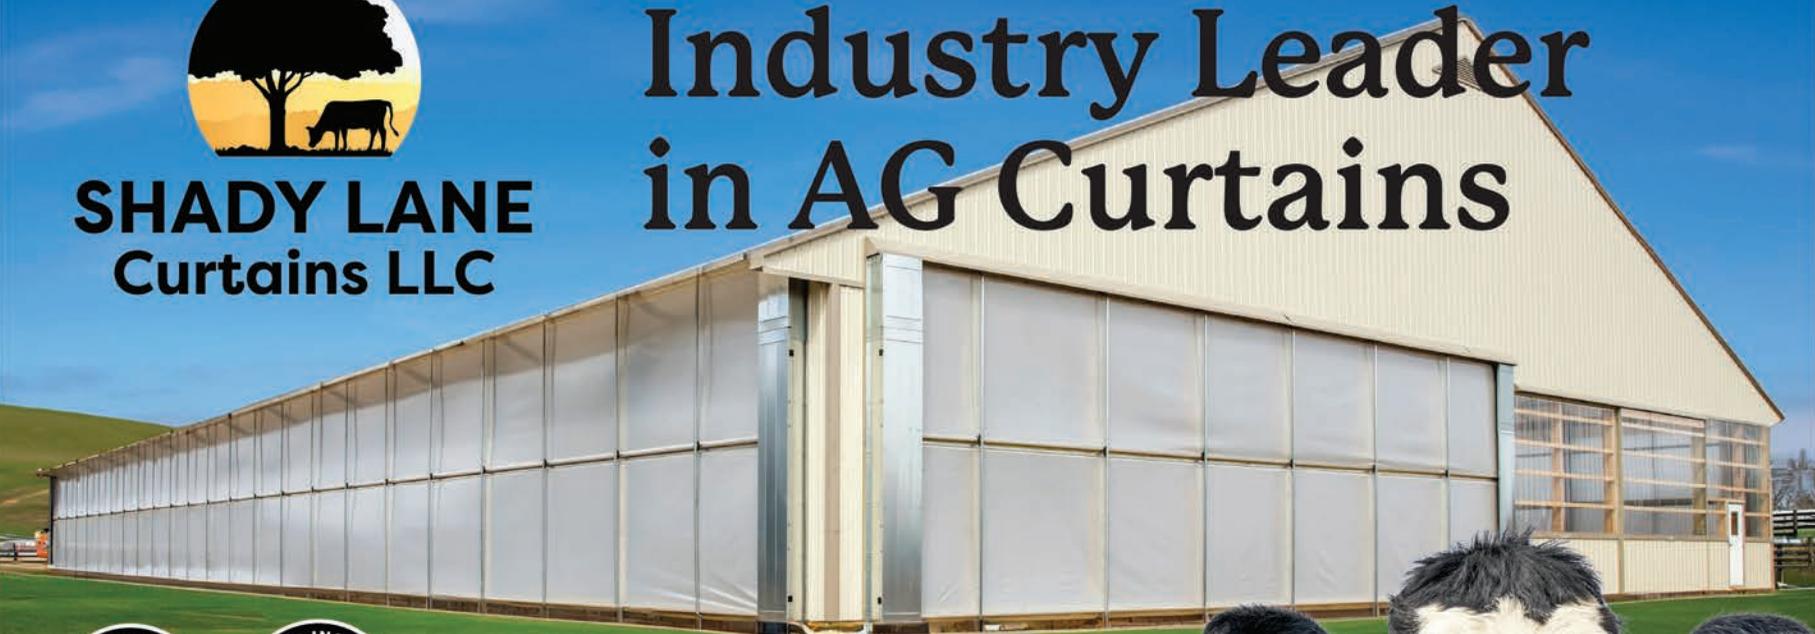

On the crop side, a record harvest, along with global supply and demand, are pushing feed costs lower, but also pushing net farm income lower with corn and soybean growers hit hardest in that decline.

Asked about the impacts of bird flu on supply and demand for dairy, Munch said it has not had a large impact overall on supply conditions. The good news on the demand side, he said: “Consumers don’t seem to be concerned. We see fluid milk sales are actually up slightly (Jan-April) over the high-point of the outbreak.”

Aug. BF \$3.56, Protein jumps to \$2.18

USDA announced higher Class and Component prices for August milk. Class II and IV at \$22.05 and \$21.58, respectively, were higher by 23 and 27 cents per cwt compared with July and significantly higher than a year ago, up \$2.17 and \$2.68, respectively. Class II continues to be nearly 75 cents per cwt above the Class I base price mover, again, for August milk.

Class III milk bounced back from the slight July dip to gain 87 cents, at \$20.66 -- up \$3.47 from a year ago.

All four-week product price averages were higher, except butter was a tad lower. The Butterfat price was near steady at \$3.56/lb for August, with Protein jumping above the \$2 mark at \$2.18/lb. Solids nonfat also gained, still valued over \$1.00/lb for August. Other solids also gained, at 30 cents/lb. This is derived from the dry whey price vs. make allowance.

Another round of big gains for dairy products on the CME spot market

The CME spot dairy product market was a sea of green this week as all four base commodities moved higher. Load counts were down from previous weeks' highs, but trade was moderate with nonfat dry milk trade seeing the largest load count (22) out of the CME from last Thurs., through this Wed., Sept. 11 and the price continued last week's rally higher to within a fraction of a penny short of the \$1.40/lb mark. Grade A nonfat dry milk was pegged Wed., Sept. 11 at \$1.3975/lb, up 4 cents from the prior Wednesday.

The CME spot butter price also traded higher on 9 loads over 5 days. On Wednesday, the spot butter price was pegged at \$3.1750/lb, up 3 cents from a week ago.

On the Class III side, the cheese market had another week of big gains. On Wed., Sept. 11, the 40-lb block Cheddar price was pegged at \$2.3150, up 8 cents/lb over the prior Wednesday, with 5 loads changing hands in 5 business days. This is 24 cents per pound more than two weeks ago, and pushed the Class III futures market as much as \$1 higher for near-term contracts. The 500-lb barrel cheese price, pegged at \$2.3850/lb, was up another 13 cents with 6 loads changing hands. Dry whey gained 2 1/2 cents on the week at 59 cents/lb Wed., Sept. 11, with 8 loads trading.

Class III milk futures top \$23 for Sept-Nov

Class III milk futures made a jump of 50 cents to \$1.00 per hundredweight for contracts through 2024 yearend. September, October and November Class III milk futures all soared above the \$23 mark, bypassing the Class IV milk futures through yearend by 10 cents to \$1.00 per cwt, as Class IV yearend contracts came under modest pressure at midweek, but the rest of the board moved modestly higher. The 2025 milk futures are a different story, with small and incremental increases at levels fully \$2 to \$3 lower than the 2024 yearend contracts on Class III and \$1.50 lower on Class

IV. There is not much activity on 2025 contracts, especially after February as the trade waits for USDA's final decision on FMMO milk pricing changes that include increases to the make allowance credits for processors and updates on standard milk composition levels for producers. In its recommended decision, USDA proposes implementing the make allowance update right away, while waiting 12 months to implement the milk composition updates -- both impact the Class III and IV formulas, which means they impact the futures board. Comments close Sept. 13, and USDA is expected to announce a final decision by mid-November, with a producer referendum to follow as early as January.

On Wed., Sept. 4, Class III milk futures for the next 12 months averaged \$20.78, up 36 cents from the prior Wednesday. The 12-month Class IV average at \$21.89, was 7 cents higher than the prior Wednesday.

American Dairy Coalition prepares FMMO comments for Sept. 13 deadline

USDA's proposed milk pricing changes could be poised to reduce farm milk prices, incentivize wider spreads between classes and introduce more complexity. One proposed change creates a new class of milk with no vetted definition during the hearing process, notes American Dairy Coalition in an email to dairy producers and organizations.

ADC has prepared a comment to file at the Federal Register Docket AMS-DA-23-0031-0002 before the deadline of Sept. 13, 2024 at 11:59 p.m. (one minute before Friday midnight).

To read ADC's full comment, go to <https://files.constantcontact.com/a653daa8501/0ad1cd83-477c-4453-8b7a-d039a90a92a4.pdf?rdr=true>

Individual dairy farmers and/or organizations wanting to sign on to this comment before filing deadline Friday night, midnight, Sept. 13, go to this link and fill out the form: <https://americandairy-coalition.wufoo.com/forms/skro3cp08hzm3/>.

In short, ADC is submitting the following requests, which are explained further in the full comment:

I. Request scrutiny and modification of USDA's surprise proposal of a two-mover Class I pricing system, which would create a new class of milk that was not defined or vetted in the hearing process. American Dairy Coalition respectfully asks USDA to reconsider, or at a minimum to modify its proposed two-mover system for Class I. We are concerned about the procedural deficits that have added an undefined fifth class of milk and precluded the study or presentation of evidence on potential impacts of splitting and further complicating Class I pricing with a second mover based on a vague application of

shelf life with no vetted parameters. We believe -- at a minimum -- further study and a vetted definition and parameters with a built-in review process are needed...

II. Request reevaluation of proposed make allowance increases, especially for Class III products, that were based on voluntary, unaudited (not mandatory, audited) cost of processing survey. According to USDA data assembled by American Farm Bureau, the FMMO product price formulas are based on a weekly price survey that captures only 14.8% of U.S. cheese, butter, nonfat dry milk and whey product sales. On the make allowance side of that equation, participation in the 2022 voluntary cost of processing survey was only 50 to 55% for Class III products (cheese and whey), but 80 to 90% for Class IV products (butter and nonfat dry milk), which tells us something about the widening spread...

III. Sync timing of the make allowance and milk composition updates. Both proposed changes impact CME contract formulas that underlie risk management. Why is USDA implementing the negative update immediately while delaying the positive update for 12 months? American Dairy Coalition respectfully asks USDA to reconsider the proposed timing for implementation of the milk composition updates, which are based on actual milk component levels today, which have not been updated since 2000. According to the American Farm Bureau, the proposed delay in implementing the proposed milk composition updates leaves \$200 million in annual pool revenue off the table for dairy farmers for one year while implementing right away the make allowance increases that will extract from pools and farmer milk checks what AFBF estimates is \$1.25 billion annually. Both updates impact the formulas that are part of the CME contracts underlying milk price risk management. The proposed make allowances would have an immediate impact on the negative side of the formula that is 6 times larger than the impact of the milk composition updates on the positive side of formula, which is much smaller, but is being delayed...

According to USDA, 89% of dairy farms are likely to be small businesses based on the 2022 Census of milk cow herd inventory and sales. Regulatory changes are evaluated for impact on small businesses, which USDA defines for dairy farms at a \$3.75 million per year income limit to establish an annual milk marketing threshold of 18.3 million pounds, excluding additional monies received by dairy producers. Based on the 2023 average yield per cow and NASS average All-Milk price, a dairy farm with approximately 780 cows or fewer would meet this definition.

The 2022 Ag Census showed the total number of farms with milk sales declined to 24,470 vs. 40,336 in 2017, and USDA reports 19,576 of them had milk regulated on an FMMO for at least one month of the year. This -39.4% decline between the 2017 and 2022 Census was the largest decline -- ever -- dating back to the 1982 Census according to a paper jointly authored by Ohio State University economist Carl Zulauf and Illinois State University economist Gary Schnitkey. "Large percentage declines in US dairy farms have been an on-going story, but the most recent decline stands out," the economists observe. "Fewer farms sold milk in 2022 than in 2017 at all herd sizes except those with 2,500 or more cows. The latter increased from 714 to 834 farms, a gain of 17%, while all other herd sizes fell dramatically. Furthermore, the authors note the 2,013 largest dairy farms in the U.S. accounted for 66% of the milk supply -- up from 53% in 2017.

A major chunk of this 5-year loss of dairy farm small businesses between the 2022 and 2017 Census includes the first 3 years in which the average-of method (plus 74-cent adjuster) has been used to calculate the skim portion of the Class I base price mover instead of the higher-of method used Jan. 2000 through April 2019.

WHAT'S NEXT?

While none of us knows for sure exactly what is in the future for the dairy industry, change is coming.

- (1) Will antibiotics be banned by consumer demand?
- (2) Will milk over 100k SCC be penalized?

A reader shares her frustrations over ‘comment period’

Editor’s Note: The following is an open, unedited letter sent by Pennsylvania dairy farmer Brenda Cochran to USDA Officials overseeing the Comment Period for the “Proposed Amendments to Marketing Agreements and Orders” from Carmel, Indiana, Hearing. We suspect that her frustrations are shared by many dairy farmers across the country.

Re: Current Comment Period Deadline of September 13, 2024, Gives Dairy Farmers Insufficient Time to Secure Copies of the Lengthy USDA Recommendations or to Thoroughly Study the Proposals Themselves, to Understand the Negative Impact These Recommendations Will Have on Their Milk Prices, Their Dairy Farming Businesses, Their Rural Communities, the Marketing of Their Milk, the Future of the FMMO System, and Consumers

I am hereby formally requesting an Emergency Extension of the official Comment Period beyond the current published deadline of September 13, 2024.

I am one of the majority of US dairy farmers who have been given insufficient time to date to both secure a copy of the 219+ pages and read and comprehend what is actually being proposed or to study and verify the negative effect of the Recommendations on dairy farmers like me, our rural dairy farming communities, and on consumers.

It is highly unlikely that a majority of dairy farmers have even secured copies of the government Recommendations or had adequate time to study them exhaustively or understand them.

To my knowledge, no impact studies have been ordered by the government or undertaken by the Land-Grant Universities to allow farmers to better decide whether or not to support the abstruse and insanely complicated proposals that go far beyond the scope of knowledge dairy farmers are expected to routinely understand and that are geared to cause additional harm to the class of citizens identified as dairy farmers.

Dairy farmers also face the special circumstances of being involved in one of the busiest times of the cropping year with summer feed harvesting.

Additionally, my dairy farming community has been devastated by deadly flooding which has caused widespread destruction

which further distracts dairy farmers in these regions and makes it difficult for these farmers to study the Recommendations themselves or any various third-party analyses that may be available to assist the affected farmers in making fully informed decisions about the specific Recommendations, or the block-voting process they now face, or the great anxious concern circulating about a “No” vote terminating the Federal Order.

Tremendous upheaval looms for the dairy farmers who have not had adequate opportunity to try to wade through the massive number of pages that comprise the federal Recommendations for the Proposed Rule.

In summary, as a matter of justice and return to page 6

Dairy deserves prominence in the Dietary Guidelines

By GREGG DOUD, NMPF President and CEO

ARLINGTON, Va. — The federal government is pressing ahead in crafting a new iteration of the Dietary Guidelines for Americans, the twice-a-decade guide to science-based advice on what to eat and drink for health and well-being. The guidelines also inform federal nutrition programs, such as school meals and food assistance.

Dairy, to no one’s surprise, is critical to the discussion. For the sake of our nation’s health, this discussion has to be done right, with proper deliberation and dairy maintaining its role as a central component of healthy eating.

A committee of experts is reviewing the latest evidence and preparing recommendations for the next iteration of the guidelines, due next year. As we said in the comments we submitted to that committee: Dairy foods are essential for optimal nutrition and health. Foods such as milk, cheese and yogurt provide a unique package of nutrients Americans

often lack, such as calcium, vitamin D, potassium, protein and iodine. Dairy also reduces chronic disease risk, lowers blood pressure, improves blood sugar control, and protects bone health. And dairy is especially important for children, who need adequate calcium and protein for growth and development.

When the government released its current guidelines in 2020, it noted that dairy is under-consumed by 89 percent of the population. Dairy’s role as a critical nutrient provider, and its underconsumption, is why dairy needs to continue as its own food group, with three recommended servings per day, in the 2025 guidelines. That standard is consistent with current practice, reflected in the nutrition guidance of many other countries and health organizations, and supported by decades of scientific research. Guidelines that don’t give dairy its due simply would not be credible – not when the science, the general public and the mainstream nutrition community all recognize that, without dairy, health outcomes suffer and families, especially families with children, don’t get the nour-

ishment they need.

Maintaining dairy’s place at the bedrock of proper nutrition is of paramount importance as the guidelines are under review. NMPF is fighting for dairy’s necessary pride of place through our public comments, our meetings at all levels of decision-making, our partnerships with allied organizations, and our daily fight against anti-dairy misinformation in media interviews and outreach. Because, as is inevitable in Washington, the guidelines are the subject of intense advocacy efforts, often by groups that have goals in mind other than better nutrition.

For example, some vegan and environmental activists are pushing for replacing some dairy foods with plant-based alternatives in the guidelines, all in the name of reducing greenhouse gas emissions. Even setting aside the flawed sustainability arguments, the answer to that is no. Plant-based products are not nutritionally equivalent to dairy foods and do not have the same health effects. In fact, most plant-

Vaccine is on track

BROOKINGS, S.D. — Animal health vaccine manufacturer Medgene has responded to notice from the USDA Center for Veterinary Biologics (CVB) on testing of vaccines to address H5N1 incidence in dairy cattle. The CVB Notice, 24-13*, now allows for vaccine studies to be conducted outside of containment facilities. The new notice has potential to accelerate agency licensure of H5N1 vaccines in dairy cows.

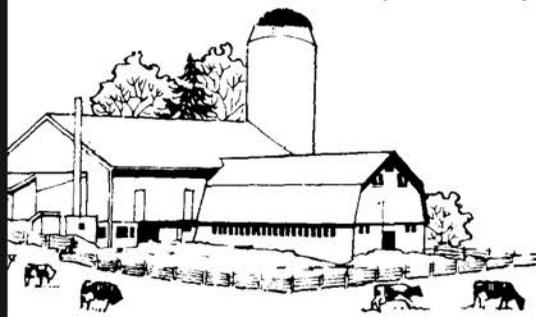

"This is great news for us, for the CVB and more importantly, the dairy industry," stated Chief Operating Officer Tom Halbur. "Our technology is founded on being able to respond to disease challenges, faster. Our protocol satisfies the stated requirements and we're looking forward to doing our part in supporting both the necessary regulatory policies and the needs of the dairy industry."

The expected result of Medgene's development work will be conditional or full licensure by the CVB to produce and distribute an H5N1 vaccine that has been proven safe and effective in dairy cattle. Medgene's prescription platform technology requires that veterinarians are involved in every critical step, including prescribing and supervising the use of the H5N1 vaccine.

Medgene has been successful in prescription platform vaccine production in the swine, cattle, rabbit and deer industries, both in the United States and internationally.

4-H auction slated

HONEY BROOK, Pa. — The Chester County 4-H Center's annual auction will take place on September 21 at the 4-H Center located at 1841 Horseshoe Pike, Honey Brook. The silent auction will start at 4 p.m., followed by the live auction at 6 p.m.

The Center is seeking donations of all kinds. Contributions can include professional services and products, handmade items, antiques, gift certificates, farm products, collectibles, artwork, used and new equipment/tools, and more. Donations may be dropped off at the Chester County 4-H Center on September 18, 19, 20, from 6 to 8:30 p.m., and on September 21, from 9 a.m. until noon. If you prefer to make a direct donation, please mail it to the Chester County 4-H Center, PO Box 697, Honey Brook, PA 19344.

Every donation helps cover the costs associated with the upkeep and improvements of the Chester County 4-H Center, ensuring it remains a valuable resource for the community.

Reader's letter _____ from page 5

spect for a fully democratic process in this weighty matter, which appears to be cataclysmic for dairy farmers, it is reasonable and necessary to extend the official Comment Period on the USDA FMMO Hearing Recommendations well beyond the current published date of September 13, 2024.

If there is any presumption that a Statute dictates the deadline date, then there must be an expedited emergency intervention by Congress to correct this flagrant violation of justice. Reasonable charity for the beleaguered and marginalized dairy farmers demands nothing less.

Dairy farmers are not offered a seat at any federal hearing table even lacking individual standing to themselves petition for a federal hearing. Only the processors and dairy cooperatives are considered "fit" to request USDA hearings yet dairy farmers are burdened to vote their "approval" of the very Recommendations that stand to cause them significant serious harm rather than vote down the Proposals and "terminate" the Order.

Death by firing squad or by slow systemic poisoning is what is being "recommended." Dairy farmers are getting railroad no matter what they do.

It is a matter of record that most dairy farmers have already been suffering devastating material harm from the ongoing decades-long low federal milk prices being paid so far below the dairy farmers' cost of production as it is.

Thank you. Sincerely,

Brenda Cochran, Westfield, PA

- *The World Forage Analysis Superbowl is presented by Dairyland Laboratories, Inc., Hay & Forage Grower, US Dairy Forage Research Center, University of Wisconsin and World Dairy Expo.*

Longevity of employees and cows are among topics of WDE seminars

MADISON, Wis. – Each year, Expo Seminars provide World Dairy Expo attendees with topics and discussions that are relevant to today's global dairy industry. This year's Expo Seminars are no different, aiming to address topics on management practices, mental health and more. Seminars are presented daily, Tuesday through Friday, in Mendota Room 1 of the Exhibition Hall at noon.

Below is the 2024 Expo Seminar. You can attend in person at WDE or online through ExpoTV at www.worlddairyexpo.com

- **Tuesday, October 1**
Cultivate Your Culture: Sandy Larson, general manager of Larson Acres, will show attendees what it takes to increase engagement and lower employee turnover.
- **Wednesday, October 2**

Net Zero Opportunities and Challenges in Dairy Production. Kim Stackhouse-Lawson, Ph.D., director and professor, AgNext and Colorado State University, will provide an overview of sustainability and discuss the

complexities in dairy production systems. It will also highlight and describe supply chain pressures related to net zero and opportunities that exist for dairy producers to consider adopting on their journey toward net zero.

- **Thursday, October 3**
Hope and Hard Work: Mental Health in Agriculture. Monica Kramer McConkey, LPC, ag mental health counselor, Eyes on the Horizon Consulting, LLC will look at why stress in agriculture is so significant. Understand what happens to us when we become stressed and look at ways to cope. This is a presentation anyone in or around agriculture will want to hear!
- **Friday, October 4**

New Perspectives on Aging and Lifespan in Dairy Cows. Matt Lucy, Ph.D., professor, University of Missouri-Columbia, will explore what we know about aging in dairy cows and what the future holds for extending the productive life of dairy cows.

Natural By Nature is looking to sign up Organic Dairy Producers.

- Family-owned operation that has been in business for 30 years.
- Have our own processing plant where we bottle our organic dairy products.
- Offer great quality premiums and an optional 100% grass-fed premium.
- No hauling, labs, or marketing fees, no equity deductions, or quotas.
- We are looking to expand our producer group in Lancaster, Berks, Perry, and Dauphin County.

Discussions on Federal Milk Marketing Orders begin Sept. 18

Focusing on U.S. milk-pricing regulations that will affect dairy producers, processors and the entire industry

JUNEAU, Wis. — On Wednesday, Sept. 18, leading dairy policy and marketing experts from across the country will come together to share their insights and answer questions on proposed changes to U.S. milk-pricing regulations that will affect dairy producers, processors and the entire industry.

Scheduled for 10 a.m. to 3:30 p.m., the National Federal Milk Marketing Orders Workshop will feature nine experts to inform producers, processors, and other industry stakeholders about the proposed amendments to all 11 FMMOs. The unique, one-day event will be hosted by Professional Dairy Producers® (PDP) in partnership with Renk Agribusiness Institute, University of Wisconsin-Madison, Dairy Markets and Policy, Cornell University, and UW-Extension.

The workshop will be held in three formats to ensure access to dairy stakeholders nationwide. The in-person session will be held at the Sheraton Madison Hotel, 706 John Nolen Drive Madison, Wisconsin, and will include lunch and the opportunity to interact

with presenters. The program will also be livestreamed for virtual access and a recording fee of \$59 applies to all three formats.

“It is essential that dairy producers across the country and all 11 Federal Milk Marketing Orders understand the proposed changes and how it could impact their operation, their order and the entire industry,” said Slinger, Wis., dairy producer and PDP executive director Shelly Mayer. “PDP is proud to work with leading experts and organizations around the country to bring this opportunity to producers so they can make an educated decision and share their opinions with their cooperatives and prepare to vote on the proposal.”

Shelly Mayer

Workshop speakers represent a diversity of tenured backgrounds and experiences specific to Federal Milk Marketing Orders. Presenters include:

- Mike Brown, chief economist for International Dairy Foods Association (IDFA)
- Stephen Cain, senior director of economic research and analysis for National Milk Producers Federation and the U.S. Dairy Export Council
- Calvin Covington, former CEO of Southeast Milk, Inc., author of numerous milk marketing articles, and several-time testifier at federal milk order hearings
- Dr. Charles Nicholson, associate professor in the Departments of Animal and Dairy Sciences and Agricultural and Applied Economics at the University of Wisconsin-Madison
- Leonard Polzin, dairy markets and policy outreach specialist at the University of Wisconsin Extension

• Dr. Mark Stephenson, retired University of Wisconsin-Madison director of dairy policy analysis

• John Umhoefer, executive director of the Wisconsin Cheese Makers Association

• Geoffrey Vanden Heuvel, director of California’s Regulatory and Economic Affairs for Milk Producers Council

• Dr. Chris Wolf, E.V. Baker Professor of agricultural economics at Cornell University

The session will feature a diverse perspective of regions and organizations to highlight potential impacts and will focus on key questions about the proposed changes. Areas of discussion will include areas of milk pricing that will be changed and what will stay the same; rationale behind proposed changes; regional implications for producers, cooperatives, processors, suppliers and consumers; timeline and process; and how the proposed changes correlate with potential for additional changes under the Farm Bill.

To learn more and to register, visit www.pdpw.org or contact PDP at 800-947-7379.

Wednesday, September 18

CDE conference call about HPAI broadens to include ‘end users’

HARRISBURG, Pa. — The Center for Dairy Excellence will host the next Dairy Industry Conference Call on Wednesday, September 18 at 1 p.m. EST to provide updates on the rapidly evolving health situation with highly pathogenic avian influenza (HPAI) affecting dairy cattle in the United States. The conference calls are held on the first or second Wednesday of each month at 1 p.m. EST. This month, the conference call will include a panel discussion with two dairy producers and two end users to help share different perspectives on the impact of the disease on dairy herds and the national footprint of end users like Cargill.

“We’re looking forward to an especially insightful discussion with several panelists this month. One dairy producer joining us from Michigan has experienced the impacts of

HPAI on his herd and plans to share his vantage point. Another Pennsylvania producer has implemented the voluntary surveillance program and will discuss how he made the decision to do this and why it matters to him,” said Jayne Sebright, executive director at the Center for Dairy Excellence.

“We’ve also invited two businesses with important perspective on how the disease impacts how they currently work with suppliers. All these perspectives are part of our industry’s collective efforts to mitigate the spread of HPAI.”

Panelists for the September 18 call are:

- Dr. Alex Hamberg, Pennsylvania State Veterinarian
- Nathan Brearley, Brearley Farms, Portland, Mich.
- Rod Hissong, Mercer Vu Farms, Mercersburg, Pa.
- Michelle Koch, Koch’s Turkey Farm, Tamaqua, Pa.

• Staclyn Himelright, Cargill Meat Solutions

Individuals who join the conference call will be able to ask real-time questions to each panelist. To ensure as many questions can be addressed as possible, questions can be submitted in advance of the call. Text 717-585-0766 to submit questions or email ctrdairyexcellence@gmail.com.

How to join the conference call:

Dial +1 301-715-8592
Meeting ID: 841 2794 6647
Passcode: 833183

• To join the conference via Zoom, visit:

www.centerfordairyexcellence.org/dairy-industry-call
The Center is continuing to work closely with the Penn State Dairy Extension Team, cooperatives and veterinarians to provide “Everyday Biosecurity Kits” to farmers upon request. To request an Everyday Biosecurity Kit at no cost, visit www.centerfordairyexcellence.org/biosecurity-kit or call the Center at 717-346-0849.

As the dairy industry learns more about HPAI and how it is affecting dairy cattle, the Center for Dairy Excellence will continue to share updates from across the industry. Visit www.centerfordairyexcellence.org/hpai to listen to recordings and read recaps of previous conference calls. Visit www.centerfordairyexcellence.org/newsletter to sign up to receive email updates and get notified of future calls, news and resources.

Two women share recognition for their extraordinary work

HARRISBURG, Pa. – Jessica Spangler of Lebanon, Pa, and Kristy York-Morse of Canton, Pa., have both been named winners of the All-American Dairy Show’s Pioneer Award.

The recognition is presented to individuals who have had a considerable impact on the overall success of the previous year’s All-American Dairy Show, exhibiting time, energy, or leadership that helped improve the quality of the show.

Jessica Rose Spangler currently serves as a Cattle Committee co-chair for the All-American Dairy Show, alongside Kristy York-Morse. They are currently in their second year serving as co-chairs. Prior to that, Jessica helped on the Cattle Committee for several years, working primarily with the Milking Shorthorn shows.

Jessica grew up exhibiting Holsteins and Jerseys at the All-American and is thrilled that her son is now exhibiting his animals at the show.

She graduated from Penn State with a degree in animal sciences and worked as the market editor for *Lancaster Farming* newspaper for several years before spending time at home with her young children. She currently works for The WebstaurantStore as a software product owner, helping to design and create the software programs that are used to run the company’s warehouses throughout the country.

Jessica and her husband, Joe, live in Lebanon, Pa., with their children, Brady and Makenna. Brady is active in 4-H and keeps busy raising a few show calves each year. Makenna shows horses and aspires to start jumping fences by next year.

“Jessica and Kristy have been long-time members of the Cattle Committee. The show would not have been a success last year without their leadership with the new entry system,” said All-American Dairy Show President Michelle Cornman. “They went over and above to solve any issue that came up during the show.”

Kristy York-Morse previously served on the Red & White Dairy Cattle Show Committee for both youth and open shows and has been involved with the All-American Dairy Show for over 15 years.

She first began attending the All-American as a 4-H member, participating in the Pennsylvania State Youth Show. Her fondest memory from those early years was seeing Northcroft Ella Elevation.

Jessica R. Spangler

Kristy York-Morse

Kristy works for Dairy Farmers of America as a field representative and is in her 28th year as a 4-H leader. She is also the state director for the Bradford County Holstein Association and is active with the Troy FFA Alumni Association. Additionally, she serves as the cattle superintendent for the Bradford County Youth Dairy Show.

Kristy and her husband, Jeff, live in Canton, Pa. They enjoy spending time with their grandchildren, Sawyer, Olivia and Carter, as they begin their 4-H careers showing dairy cattle and market lambs.

The All-American Dairy Show’s awards will be presented on Monday, September 18, during the Premier National Junior Show at the Pennsylvania Farm Show Complex and Expo Center in Harrisburg.

1. An experienced and talented classifier.
2. A director of sales and market development, which is a new position.

Holstein Association classifiers objectively and accurately evaluate cows and offer informative, promotional, and educational programs to members and breeders.

HAUSA is looking for a candidate with:

- B.S. in Dairy or Animal Science or related field preferred
- Five years of relevant experience

Competencies and requirements include:

- Extensive dairy background and knowledge of the dairy industry
 - Competent in accurately evaluating conformation of dairy cattle
 - Must have valid driver's license and insurable driving record
 - Excellent communication skills
 - Excellent ability to work independently and effectively with little supervision
 - Excellent time management skills
 - Ability to travel extensively is required
 - Basic computer skills, including proficiency with email and Microsoft Office programs (Word and Excel)
 - Participation in a collegiate dairy judging team is a plus
- Questions can be directed to Human Resources at employment@holstein.com.

WANTED: A director of sales and market development; a new position

The dynamic and results-driven director of sales and market development will lead HAUSA's sales team and drive growth in their product and service offerings. He or she will lead strategic initiatives aimed at expanding market presence, enhancing member engagement, and driving revenue growth. This key team member is responsible for developing and executing comprehensive sales strategies, fostering strong relationships with key stakeholders, and identifying new market opportunities. The Association is looking for a candidate with:

- Bachelor's degree in business, marketing, animal/dairy science, or a related curriculum is preferred.
- 8+ years of progressive experience in sales or business development within the agriculture or dairy industry (dairy background and knowledge of dairy cattle is desired).
- 6+ years in a supervisory/management role.

Competencies and requirements include:

- Proven track record of developing and executing successful sales strategies that have driven revenue growth and market expansion, preferably within the agricultural or dairy industry.
- Excellent strategic thinking skills with a forward-looking mindset, able to anticipate market trends and capitalize on emerging opportunities.
- Excellent interpersonal, organizational, written, verbal, and listening communication skills required.
- Strong leadership skills with experience managing and motivating high-performing teams.
- Strong telephone and computer skills (including Microsoft Office suite) necessary.
- Ability to effectively communicate, plan, organize and work independently in a team environment.
- Understanding of dairy genetics and familiarity with Holstein cattle breeding is a plus.
- Some travel required.

The Holstein Association USA is the largest dairy breed organization in the world. Since its formation, the Holstein Association has been dedicated to the development of the Holstein breed. The Association maintains the records for all ancestry, identity, ownership, and performance information on more than 22 million Registered Holstein cattle.

Questions can be directed to Human Resources at employment@holstein.com.

Gathered for the Premier Exhibitor photo were, standing, left to right: Logan, Mark, Lily and Mandy Guillaume, Rebecca, Steve, Aaron, Annette, Kait Worthington. Kneeling are Shiloh and Hannah Kriechbaum and Brynn Guillaume.

Premier Breeder honors went to Nora, Brenda, Noah, Jimmy, Ava and Emma Harris, pictured with Judge Raechel Sattazahn.

PENNSYLVANIA HOLSTEINS

Bucks County champion shown by Jacob Heacock

WRIGHTSTOWN, Pa. — The Bucks County Holstein Show was held on Friday, August 16th at the Middletown Grange Fair in Wrightstown with Raechel Sattazahn of Womelsdorf, Pa. placing the classes.

The senior champion, grand champion, best udder and best bred & owned cow was a junior 3-year old, Happi Hollow Select Daisy, owned by Jacob Heacock of Perkasio. The reserve senior champion and reserve grand champion was a senior 3-year old, OCEC

Merid Peppermint-ET, leased as a 4-H cow by Zoe Kelter of New Hope.

Named junior champion was Cherry H&S Riu-Red-ET, a 4-H winter calf, owned by Raegan Wolfe of Perkasio. The reserve junior champion was Milkhouse Brayden Ally, a 4-H spring yearling owned by Ava Harris of Perkasio.

The Premier Breeder banner was awarded to the Harris family of Perkasio while the Premier Exhibitor banner went to the Worthing-

ton family of Curly Hill Farm, Doylestown.

Class placings follow:

Spring calves: 1. Darkhorse Crushabull R Kelly, Emma Harris; 2. Raegan Wolfe; 3. Kennedy Wolfe; 4. Ella Bahnck; 5. Leah Greer

Winter calves: Cherry H&S Riu-Red-ET, Raegan Wolfe; 2. Emma Harris; 3. Ava Harris; 4. Ella Bahnck; 5. Ava Harris

Fall calves: 1. Andrews Anist Turnip-Red-ET, Raegan Wolfe; 2. Sara Geissinger; 3. Madison Kerest; 4. Anna Bahnck; 5. EmilyGrace Sueta

Summer yearlings: 1. Milkhouse Brayden Ally, Ava Harris; 2. Madison Kerest; 3. Emma Crooke; 4. Zoe Kelter

Spring yearlings: 1. Ensenada Role Pray, Bishop Family; 2. EmilyGrace Sueta; 3. Kendall Dewitt; 4. Luci Leatherman; 5. Aaron Worthington

Winter yearlings: 1. Darkhorse D Lamb Rebecca-ET, Jimmy Harris; 2. Niall Gleeson; 3. Dina Sprangers

Fall yearlings: 1. Red Carpet War Cam-Red-ET, Dylan Kulp; 2. Emma Harris; 3. Allison Dewitt

Best three junior females: 1. Ensenada Holsteins, Bishop Family; 2. Curly Hill Farm; 3. Meadow Springs Farm

Dry cows: 1. Golden Rose Rainer, Kendall Heintz; 2. Kendall Heintz

DLT scholarships presented

HARRISBURG, Pa. — Emily Hornberger of Snyder County, Pennsylvania and Ava Kaskela of Chester County, Pennsylvania were recently awarded scholarships through the Dairy Excellence Foundation's Dairy Leaders of Tomorrow (DLT) Program. The students were recognized with the scholarships after completing and passing at least one of the Dairy Leaders of Tomorrow certification exams and associated coursework during their high school careers. As college freshmen for the 2024-25 school year, both Emily and Ava received a \$3000 scholarship to support their academic studies in dairy-related fields.

• Emily Hornberger is a freshman studying animal science at Penn State University. She grew up on her family's crop farm and developed an interest in dairy cows after caring for and raising a few calves. She took the Dairy Leaders of Tomorrow courses during her time at Selinsgrove Area High School and learned about herd management, animal husbandry, and more. Because of her experience taking the courses and gaining in-depth, practical knowledge about the dairy industry, Emily is considering a career as a large animal veterinarian.

"This scholarship means the world to me. This financial support goes toward not only my education, but also my future. It's crucial in my future aspiration of becoming a veterinarian.

I will be forever thankful for the Dairy Excellence Foundation and its generosity," Emily said.

• Ava Kaskela is a freshman studying animal science at the University of Delaware. While Ava did not grow up on a dairy farm, she joined her local 4-H program at the age of 9. She began showing and raising dairy cattle and began her own herd in 2019. She currently works on a dairy farm in Chester County and also has experience with dairy judging, dairy knowledge teams, and the Pennsylvania Dairy Princess and Promotion Program. She served as a National Ayrshire Youth Delegate for the years of 2021-2022 and 2023-2024. After taking the Dairy Leaders of Tomorrow courses during her time at West Chester East High School, she learned more about the careers available in the dairy industry and made connections with dairy professionals. She hopes to become a livestock nutritionist and manage her own dairy operation.

"Being awarded this scholarship is a great honor, and I am extremely blessed and grateful to be a recipient. It has been an amazing experience being part of a program that is such a strong support for the dairy industry's youth. This scholarship will aid me in furthering my agriculture education, and being able to give back to the industry that has given so much to me," Ava said.

Auction Co. and sellers are not responsible for accidents.

Payment Terms: Cash, approved check, or credit card w/3% fee. Auction held in tent. Food stand on premises.

'Discover Dairy' gets around

HARRISBURG, Pa. — A group of 69 elementary and middle school teachers from a total of 22 states, including Pennsylvania, provided their students with hands-on learning experiences at local dairy farms this past spring. The teachers, who are enrolled in the Dairy Excellence Foundation's Discover Dairy program, received dairy farm field trip grants through the Dairy Excellence Foundation, Pennsylvania Dairy Farmers' Association and Dairy Farmers of Wisconsin. The grants, which amounted to more than \$30,000, allowed more than 2900 students to tour dairy farms in their community and talk firsthand with dairy farmers and their families.

During the farm tours, students discovered how farmers care for their cows, conserve their natural resources, and produce nutritious dairy products. Teachers also used the farm tour field trip as an opportunity to build connections to their educational curriculum and local community.

Funds from the dairy farm field trip grants can assist teachers in paying for busing, farm tours, lunch, or dairy treats. Any classroom currently enrolled in the Discover Dairy program is eligible to apply, with several grants designated specifically for Pennsylvania and Wisconsin classrooms.

Through these hands-on learning experiences, students gained an appreciation for:

• How important dairy farming is to their community.

• The work that goes into dairy products on grocery store shelves.

• Making their own food. "We visited a working dairy farm in Pennsylvania, Walmoore Holsteins. I bought a read-aloud story [about dairy farms], and we made our own butter. We loved all of the opportunities this grant afforded us," said Tanya, a fourth-grade teacher from Pennsylvania and farm tour field trip grant recipient.

• Interacting with animals. "My pre-kindergarten students traveled to a local dairy farm in Texas. When we pulled into the driveway, our students began clapping on the bus. It was the sweetest gesture of gratitude expressed by four and five-year-old students. Our students got to interact with baby calves and each student was given the opportunity to milk a cow. We are very grateful for the grant that enabled us to fund this field trip," said Doedee, a pre-kindergarten teacher from Texas and farm tour field trip grant recipient.

• Setting foot on a farm for the first time. "Each child had the opportunity to pet a cow, feed a calf, feed a goat, and milk a cow. They loved this experience," said Elly, an elementary school teacher from Illinois and farm tour field trip grant recipient.

The Discover Dairy program also includes the popular Adopt a Cow program, which impacts more than one million students each school year and connects classrooms directly to a calf from a progressive dairy operation.

BRUBACKER'S QUALITY DAIRY SALES

10 BROWN ROAD, SHIPPENSBURG, PA

Thursday, September 19th @ 7:15 P.M. Special Dairy Cow & Heifer Sale

- ★ We are expecting a good selection of fresh and fancy, 2 and 3 yr. olds out of local overstocked herds and heifer growers. Mostly A.I. sired including several good Registered cows, with most on test w/ low SCC and milking well!!

CDE DAIRY MARKETS & MANAGEMENT UPDATE

All prices — SEPT. 11, 2024 — except where noted

JAYNE SEBRIGHT
Executive Director, CDE
717.346.0849
jsebright@centerfordairyexcellence.org

A reminder to be safe: The National Safety Council always earmarks the third week in September as National Farm Safety and Health Week. The annual promotion was first an initiative by President Franklin D. Roosevelt in 1944 to remind the farm community to prioritize safety. As farm equipment has gotten much larger and farm practices have gotten much more complex, being aware of the dangers on a farm continues to become more and more important.

The statistics do not lie. According to the US Bureau of Labor, farming is one of the most dangerous professions today. In 2019, 573 people died from farm accidents – or the equivalent of 23.1 deaths per every 100,000 workers. Unfortunately, many farm accidents involve kids, with around 100,000 children under the age of 20 injured each year on the farm. Many accidents happen simply because those involved do not stop and think about being safe.

September was originally selected as Farm Safety Month because of the higher instances of accidents this time of year. That's because it is in the middle of fall harvest, one of the busiest times of year on the farm when all hands are needed. Sometimes that means putting inexperienced drivers behind the wheel of 10-wheeler trucks or strapping the toddler into the buddy seat so mom can pack trench while others are busy hauling silage in from the field. It's important in these instances and every other instance on the farm to keep safety at the forefront.

Having written protocols to remind everyone to stop and think about the safety hazards that exist is also important. These protocols should be written for working with cattle, with equipment, with chemicals, and in other hazardous areas on the farm. Posting things like "Make eye contact with the driver before approaching large equipment" or "Keep all chemicals out of reach from children" may seem simple to you, but they can go a long way in keeping everyone safe. Review your protocols with your employees and family members regularly and make sure people can see them. If you see someone not following the protocols, remind them they are in place for a reason and encourage them to follow them.

We are just getting started with the harvest season, which is an important time to remember these safety protocols. Many dairy farmers around Pennsylvania have started chopping corn silage, especially in

the droughty pockets of the state. About 57% of the corn crop across Pennsylvania is in the dented stage, according to the latest USDA Crop Progress Report, which is above where we were last year at this time. The USDA report also has 68% of Pennsylvania's corn crop rated in "good" to "excellent" condition, despite reports of droughty conditions across the state.

USDA continues to project a record corn harvest, with the August World Agricultural Supply and Demand Estimates report projecting the 24/25 production forecast at 1.5 billion bushels. The report included the season's first survey-based corn yield, projected at a record 183.1 bushels per acre. With these projections, corn futures prices on the CME have been falling over the past couple of months, with Sept. corn at \$3.84 per bushel and Dec. at \$4.07 per bushel. Both are well below where prices were a year ago at this time. The next WASDE report is due out on Sept. 12 and could influence how these prices continue to move throughout the harvest season.

Regardless of where prices head or what your harvest yields, remember that safety must come first. We can recover from poor yields and low commodity prices. But it's very difficult for a farm and a family to recover after a tragic accident.

Our Center also has several farm safety resources available on our website. The first is a set of farm safety signs that you can use to create awareness around potential danger zones on your farm. You can request these signs at no cost at centerfordairyexcellence.org/request-farm-safety-signs/. We also have short 60-second videos to remind your employees about farm safety. They can be found at centerfordairyexcellence.org/farm-safety/.

No matter if you are in the chopper, hauling loads, in the parlor, or your office, be sure to join our Dairy Industry Monthly Call on Wed., Sept. 18, at 1 p.m. To connect, dial 301-715-8592 and use 813 6659 8116 as the meeting ID and 162069 as the passcode. Along with two end users and a Pennsylvania dairy producer doing the voluntary surveillance program, we'll have Nathan Brearley on the call, a Michigan dairy producer who went through a HPAI outbreak on his farm. Hearing his story is eye-opening for those of us in Pennsylvania who don't have any experience with the disease.

Prices change daily. This market information is an example for educational purposes. The market data shown below are compiled weekly by Farmshine, via CME & USDA reports.

Summer Fun – how was yours??

Hot weather is fun at the beach but not in the parlor when you find mastitis.

How many cows did you treat, dump and cull this summer? How many last summer and are you looking forward to next summer? Coming up is a bit of rainy weather to bring even more mastitis good times.

Why is mastitis still your friend? Research has shown that your milking system pushes and pumps milk and bacteria up the teat canal when the liner closes. Isn't it time for change given the rising cost of replacements?
